B.TECH- CIVIL ENGINEERING

(CHOICE BASED CREDIT SYSTEM)

Sem: III (3rd)	**Total Hours Distribution per week**	
Total Credit : 4	**Lecture (L): 3 Hrs**	**Tutorial/Activity (T/A): 1 Hr.**
Subject Code	**BTCVE301T**	**APPLIED MATHEMATICS-III**

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	The aim is to introduce and develop the advanced Mathematical Skills of Engineering students that are imperative for effective understanding of Civil Engineering subjects.
2	The topics covered will equip them with the techniques to understand advanced level Mathematics and its applications that would enrichlogical thinking power.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Apply Fourier series in the analysis of periodic functions not in terms sine and cosine encountered in engineering problems
2	Solve Partial differential equations of first, higher and second order using elementary techniques; formulate mathematical models to simple problems of vibration of strings and beams in terms of Partial differential equations and solving with elementary solution techniques.
3	Learn the concept of finding maxima and minima of definite integral involving unknown function and its derivatives.

4	Learn Eigen value problem and its applications.
5	Learn to find an approximate solution of algebraic and transcendental equations, system of linear equations and first order ordinary differential equations by various Numerical Methods
6	Formulate simple optimization problem and learn to solve it by Graphical method and Simplex method.

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1 (FOURIER SERIES)			
Periodic functions and their Fourier expansions, Even and Odd functions, Half range expansion.	5	1	1
UNIT NO.2 (PARTIAL DIFFERENTIAL EQUATIONS)			
Partial Differential Equations of first order first degree i.e. Lagrange's form, Linear Homogeneous Equations of higher order with constant coefficients. Method of separations of variables, Applications to simple problems of vibration of strings and beams.	10	1	2
UNIT NO.3 (CALCULUS OF VARIATIONS)			
Maxima and minima of functional, Euler's equation, Functionals dependent on First & Second orders derivatives.	5	1	3

UNIT NO.4 (MATRICES)			
Linear dependence of vectors, Characteristics equations, Eigen values and Eigen vectors. Reduction to diagonal form, Sylvester's theorem, Quadratic form, Association of matrices with linear differential equation of second order with constant coefficients.	**8**	**1**	**4**
UNIT NO.5 (NUMERICAL METHODS)			
Solution of Algebraic and Transcendental Equation: Bisection method, False position method, Newton –Raphson method Solution of system of simultaneous linear equations: Gauss elimination method, Gauss Seidel method, Crouts method. Numerical solution of ordinary differential equation :Taylor's series method, Picard's method, Runge- Kutta 4^{th} order method, Euler modified method and Milne's Predictor- Corrector method.	**12**	**1**	**5**
UNIT NO.6(INTRODUCTION TO OPTIMIZATION TECHNIQUES)			
Linear programming problem: Formulation, Graphical method, Simplex method.	**8**	**1**	**6**

Sem: III (3rd)	**Total Hours Distribution per week**		
Total Credit:3	**Lecture (L): 3 Hrs**	**Tutorial/Activity (T/A): NA**	**Practical (P): 1 Hr.**
Subject Code	**BTCVE302T**	**FLUID MECHANICS**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15marks for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	To impart the importance and practical significance of various fluid properties
2	To discuss and evaluate various forces acting on partially and fully submerged bodies
3	To discuss and evaluate the importance of various parameters on the fluid motion.
4	To discuss various flow measuring devices with their practical applications
5	To deliberate the concept of impulse momentum principle, dimensional analysis and model analysis of a fluid phenomenon

Course Outcomes	
After completion of syllabus, students would be able to	
1	Understand the importance and practical significance of various fluid properties
2	Comprehend and estimate various forces acting on partially and fully submerged bodies
3	Evaluate the importance of various parameters on the fluid motion.
4	Know various flow measuring devices with their practical applications
5	Illustrate the concept of impulse momentum principle, dimensional analysis and model analysis of a fluid phenomenon

B.TECH - CIVIL ENGINEERING

(CHOICE BASED CREDIT SYSTEM)

BTCVE302T - FLUID MECHANICS

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1 (INTRODUCTION)			
1. **Fluid Mechanics and its importance** in Civil Engineering, Rheological diagram and itssignificance. 2. **Fluid Properties**: Basic Properties, Viscosity and its Significance, Surface Tension, Capillarity, Compressibility, Vapour Pressure. 3. **Pressure and its measurement**: Pressure at a point and its representation, atmospheric and gauge pressure, Pressure measurement by manometer, information about mechanical and digitalpressure gauges.			
UNIT NO.2			
1.**Hydrostatics**: Total Pressure and centre of pressureon for a plane surface and curved surface immersed in fluid. Numerical Problems. 2. **Stability of Floating Bodies**: Archimedes Principle, Metacentre and centre of buoyancy, Metacentric height and its determination, Stability of floating bodies partially submerged and fully submerged. 3. **Fluid masses** subjected to relative equilibrium, effect of horizontal and vertical acceleration on the moving fluid masses.			
UNIT NO.3			
1. Kinematics of Flow: Euler and Lagrangian approaches, velocity and acceleration of fluid, local and convective acceleration, Continuity equation, Stream function and velocity potential functions, Streamline, Path line and streak lines. **2. Kinetics of Flow:**Forces acting on a fluid mass, Euler's Equation of motion, Bernoulli's Equation.			

UNIT NO. 4			
Flow measuring Devices: (a) For pipeline- Venturimeter, orifice meter, Nozzle meter, Pitot Tube for velocity measurement (b) For tank- Orifice and its types, hydraulic coefficients, mouth piece and its types. (c) ForOpen Channel- Notches and weirs, velocity of approach, End contraction, Sharp crested,broad crested weir and Labriynth weir			
UNIT NO. 5			
1. **Impulse momentum principle** and its application, impact of jet, concept of velocity triangle. 2. **Dimensional Analysis**, Dimensionally Homogenous equation, Methods of Dimensional Analysis, Dimensionless numbers 3. **Model Analysis**: Types of similarities, Reynold's and Froude's model law, Distorted and Undistorted model.

Sem: III (3rd)	**Total Hours Distribution per week**	
Total Credit : 4	**Lecture (L): 3 Hrs**	**Tutorial/Activity (T/A): 1 Hr.**
Subject Code	**BTCVE303T**	**SOLID MECHANICS**

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	To determine the Mechanical behavior of the body by determining the stresses, strains produced by the application of load and to apply the fundamentals of simple stresses and strains.
2	To determine the Shear Force and Bending Moment at a section for different condition.
3	To facilitate the concept of bending and its theoretical analysis in a beam To determine the Bending and shear stress in a given beam.
4	To develop slope and Deflection equations for beams subjected to various loads.
5	To determine the torsion in circular section, Direct and Bending Stresses

Course Outcomes	
After completion of syllabus, students would be able to	
1	Understand the behaviour of materials under different stress and strain conditions.
2	Evaluate and draw shear force diagram and bending moment diagram and their relation.
3	Formulate the bending and shear stresses equations and able to draw bending and shear stress diagrams.
4	Formulate slope and Deflection equations for beams subjected to various loads by Macauleys method
5	Analyze and Evaluate the torsion in circular section, Direct and Bending Stresses

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1 (STRESS AND STRAIN)			
Concept of stress and strain, Stress-Strain diagrams and their Characteristics for mild steel and TOR Steel.	**2**	**1**	**1**
Stresses and strains in simple, composite bars in uniaxial tension and compression,	**3**	**1**	
Temperature stresses in simple restrained bars, composite bar.	**2**	**1**	
Elastic Constants and Relation between them. Introduction to Biaxial And triaxial loading.	**1**	**1**	
UNIT NO.2 (SHEAR FORCE AND BENDING MOMENT)			
Types of Beams. Shear Force and Bending Moment	**1**	**1**	**2**
Relation between Bending Moment and Shear Force	**1**	**1**	
Bending Moment Diagram and Shear Force Diagrams	**5**	**1**	
UNIT NO.3 (STRESSES IN BEAMS)			
Bending Stresses in Beams, Assumptions and derivation of simple bending theory	**2**	**1**	**3**
relation between bending moment, bending stress and curvature of homogeneous and composite beams,	**2**	**1**	
Shear stresses in simple beams, Shear flow and shear stress distribution,	**2**	**1**	
shear stress in composite beams, combined effect of bending moment and axial force.	**2**	**1**	
Principal stresses, maximum shear stresses	**2**	**1**	

UNIT NO.4 (DEFLECTION OF BEAMS)			
Differential equations of the deflection curve. Bending of uniformly loaded beams.	**1**	**1**	**4**
Deflection of simply supported beam loaded by a concentrated load.	**2**	**1**	
Introduction to Macauleys method. Deflection of a simply supported and cantilever beam by the Macauleys method.	**2**	**1**	
Method of superposition. The deflection of beams with overhangs.	**2**	**1**	
UNIT NO.5 (TORSION, DIRECT AND BENDING STRESSES)			
Direct and Bending Stresses	**2**	**1**	**5**
Torsion of circular section, assumptions and derivation of relations Between torsional moments, shear stress and angle of twist.	**3**	**1**	
Torsion in thin walled hollow section closely coiled helical springs.	**2**	**1**

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15marks for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	To impart knowledge about index properties and their determination.
2	Introduce to the students, the principle permeability and seepage in the soil.
3	To impart knowledge about engineering properties and their determination.
4	Familiarize the students with the procedures used for Shallow and Deep foundation.
5	To impart knowledge about Basic Geology.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Find the index and engineering properties of the soil.
2	Determine properties & demonstrate interaction between water and soil.
3	Analyze and compute principles of compaction and consolidation settlements of soil.
4	Ability to analyze to calculate bearing capacity, earth pressure and foundation settlement.
5	Study and identify different type's natural materials like rocks & minerals and soil.

BTCVE304T- GEOTECHNICAL ENGINEERING

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1 (INTRODUCTION AND PHASES OF SOIL)			
Formation of soil, residual & transported soil, major deposits found in India.	1		1
Soils generally used in practice such as sand, gravel, organic soil, clay, Betonies, black cotton soil etc.	1		1
Various soil weight & volume inter-relationship.	1		1
Index Properties & Their Determination, Water content, specific gravity, sieve analysis, particle size distribution curve, sedimentation analysis.	2		1
Consistency of soil, Atterberge's limits.	2		1
Classification of Soil: Particle size classification, Textual classification, Unified & I.S. classification system.	2		1
UNIT NO.2 (PERMEABILITY, SEEPAGE & STRESS DISTRIBUTION)			
Darcy's law & its validity, Discharge & seepage velocity, factors affecting permeability.	1		2
Determination of coefficients of permeability by Laboratory and field methods.	1		2
Permeability of stratified soil. insitu permeability test.	1		2
Seepage pressure, quick sand condition, characteristics & uses of	1		2

flownets.			
Preliminary problems of discharge estimation in homogeneous soils, Effective, Neutral and total stresses in soil mass. Piping, filter criteria.	1		2
UNIT NO.3 (CONSOLIDATION & COMPACTION)			
Compression of laterally confined soil, Terzaghis 1-D consolidation theory (formation of Differential equation).	1		3
Determination of coefficient of consolidation, Degree of consolidation.	1		3
Determination of preconsolidation pressure, Settlement, Rate of settlement.	1		3
Compaction: Mechanism of compaction, factors affecting compaction.	1		3
Standard & modified proctor Tests, field compaction equipments, quality control.	1		3
Advance compaction Techniques, Nuclear density meter.	1		3
Shear Strength: Introduction, Mohr Coulomb's theory, Drainage condition.	1		3
Measurement of shear strength by direct shear test, triaxial test, unconfined compression test.	1		3
Vane shear test, sensitivity. Shear strength of clays and sands.	1		3
UNIT NO.4(SHALLOW & DEEP FOUNDATION)			
Bearing capacity of soil: Factor affecting bearing capacity, Terzaghis theory.	1		4
Its validity and limitation, types of shear failure in foundation soil.	1		4
Effect of water table on bearing capacity, Settlement of shallow foundation.	1		4
Classification of piles, constructional features of cast- in – situ & pre cast concrete piles.	1		4
Pile driving methods, effect of pile driving on ground.	1		4
Pile capacity by static formula & dynamic formulae spacing of piles in group, negative skin friction and its effect on pile capacity.	1		4

UNIT NO.5 (PHYSICAL GEOLOGY)			
Introduction and scope of Geology and subdivision ,Internal structure of the earth, Weathering, erosion and denudations process on earth material and natural agencies	1		5
Geological work of wind, river underground water and glaciers.	1		5
Earthquakes: Basics of earthquake, earthquake history, seismic activity, concept of intensity and magnitude of earthquake, causes of earthquake	1		5
Influence on civil structures and engineering consideration, seismic zonation, Stratigraphy of INDIA-Introduction.	1		5

List of Experiments :

A. Any 10

1. Moisture content and Specific gravity of soil.
2. Grain size Analysis – (Sieve Analysis).
3. Consistency limit, plastic limit and liquid limit of soil.
4. Hydrometer Analysis.
5. Constant Head Permeability test of or Falling Head Permeability test.
6. Consistency limit of soil (shrinkage limit).
7. Field Density by sand replacement method.
8. Field Density by core cutter method.
9. Unconfined compression test.
10. Direct shear Test.
11. Triaxial shear test (Demonstration).
12. Study of Plate load Test.
13. Proctors compaction Test and Proctor needle test.

B. One field visit or one case study included in journal.

C. Use of plasticity Chart or Newmarks Chart.

Course Objectives	
1	To prepare the students to understand components of buildings and their functions.
2	To prepare students to understand execution of various constructions activities and material.
3	To prepare students to analyse behaviour of structure under different environmental conditions.
4	To prepare students to identify & suggest rectification the various defects in civil engineering works.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Identify components of a building.
2	Differentiate and identify types of building materials.
3.	Select appropriate material for building construction.
4.	Plan various construction related activities and their quality control.
5.	Know & identify the latest techniques and materials used.

BTCVE305T - BUILDING CONSTRUCTION &
ELEMENTARY BUILDING DRAWING

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1 (FOUNDATIONS)			
Foundations: Necessity and types of R.C.C. foundations, Detail of Deep foundation and precast foundation in general, Details shallow foundations.	3		4
Bearing capacity of soils and its assessment. Preumptive bearing capacity values from codes. Loads on foundations. Causes of failures of foundations and remedial measures,	2		4
Foundation on black cotton soils Setting out foundation trenches, excavation timbering of foundation trenches. Load bearing and framed structures.	2		4
	7		
UNIT NO.2 (BRICKWORK AND STONE WORK)			
Qualities of good bricks, classification of bricks, Terms used in brickwork, commonly used types of bonds in brickwork such as header, stretcher, English and Flemish bonds, principles of construction. Reinforced brickwork.	2		2
Parapets, copings, sills and corbels, brief introduction to cavity walls, load bearing and partition walls. Masonry construction using cement concrete blocks and clay blocks, load bearing and partition walls. Precast construction: Introduction to method and materials. Precast elements likes poles, cover, jellies, steps corbels, truss element etc.	2		3
Selection of stones types of stone masonry, principles of construction	2		2

Joints in masonry. Lifting heavy stones, common building stones in India.			
Arches and Lintels: Terminology in contraction, types chajjas and canopies, pre cast Lintels & Arches.	**2**		**3**
	8		
UNIT NO.3 (DPC, FLOORS AND ROOFS)			
Damp Proofing: Causes and effect of dampness. Various methods of damp proofing Damp proofing in plinth protection, New Techniques of Damp Proofing Damp Proofing in Plinth Protection, New Techniques of Damp proofing. Epoxy etc.	**3**		**3**
Floors: General principals, types and method of construction, floors finished quality, testing floor tiles, synthetic & Ceramic Tiles.	**2**		**1**
Roofs: Flat and pitches roofs, roof coverings, types AND their constructional features. Thermal Insulation	**2**		**5**
	7		
UNIT NO.4 (STAIRS, DOORS AND WINDOWS)			
Stairs: Types of stairs, functional design of stairs.	**3**		**4**
Doors and Windows: Purpose materials of construction and types.	**4**		**4**
	7		
UNIT NO.5 (PLASTERING AND POINTING, PAINTING)			
Plastering and Pointing : Necessity, types and methods	**2**		**2**
Temporary Timbering: Centering and formwork shoring, underpinning and scaffolding.	**3**		**2**
Painting: White washing, colour washing and distempering new materials & Techniques.	**2**		**2**
	7

(CHOICE BASED CREDIT SYSTEM)

Sem: III (3rd)	**Total Hours Distribution per week**		
Total Credit : 1	**Practical (P): 2 Hrs.**		
Subject Code	**BTCVE305P**	**BUILDING CONSTRUCTION & ELEMENTARY BUILDING DRAWING**	
Examination Scheme - Practical			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
25 Marks	**25 Marks**	**25 Marks**	**--**

List of Experiments:

1. Development of a given line plan of a residential building.
   Draw to a scale of 1: 50
   1. Detailed Plan.
   2. Elevation.
   3. Section.

2. Following Sketches pertaining to the above plan (with Standard Dimensions)
   a. Door- Panelled door
   b. Window
   c. Stair
   d. Masonry
   e. Lintel

3. Students should prepare working drawing of Foundation Plan (on tracing paper) for the above Residential Building Plan. It should contain detailed foundation plan with foundation details. (Use suitable scale 1:50 or 1:100)

4. Draw sketches using computer software of the following:
   1. Foundations- two plates
   a) Line sketches of shallow and deep footing.
   b) Details of any one of the shallow footings.
   2. Arches- two plates.
   a) Different types of arches
   b) Details of arch showing different components
   3. Trusses- one plate. (Showing different components)

5. One seminar report and presentation based on various aspects of Modern materials and construction methods.

6. Site visit and technical report on the visit (Minimum Two).
(Visit should contain Stage of visit, related sketches of components-C/S-Dimensions, Materials used, site plan sketch and detailed report etc.) Visit to a construction related exhibition is strongly recommended.

7. Collection of advertisements of modern construction materials and Tools used in construction.

8. Indoor dimension: Height of kitchen platform, bathroom fittings positioning details, furniture details etc.

Note: Collection of local byelaws details from the surrounding areas, Building plan according to byelaws. Carrying a 5m tape is compulsory to all.

List of Code/Handbook

Sem: III (3rd)	**Total Hours Distribution per week**		
Total Credit: 2	**Lecture (L): 2Hrs**	**Tutorial/Activity (T/A): N.A**	**Practical (P): N.A**
Subject Code	**BTCVE306T**	**EFFECTIVE TECHNICAL COMMUNICATION**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
15 Marks **(07 marks for sessional Examination)** **(08 Marks for Activity based)**	**35 Marks**	**23 Marks**	**2 Hours**

Course Objectives	
1	To enhance competency in English language among learners aspiring to be entrepreneurs.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Participate effectively in groups with emphasis on listening and meta cognitive thinking.
2	Prepare memorandum and report.
3.	Deliver an effective oral presentation.
4.	Acquire public speaking skills handling the audience professionally.
5.	Analyze causes of deterioration of concrete components

Subject Code	**BTCVE501T**	**Name of Subject: Hydraulics Engineering**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15marks for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To know the boundary layer theory and concept of drag and lift
2	To understand the various losses occurring in pipe flow, various phenomenon occurring in this case
3	To compute uniform flow through open channel and understand the concept of specific energy
4	To analyse the gradual varied flow and hydraulic jump concept
5	To understand the design principle of various hydraulic machines likes turbines and pumps

Course Outcome	
After completion of syllabus student able to	
1	Understand the concepts related to boundary layer theory and determination of drag and lift forces
2	Apply the knowledge of theories and equations of pipe flow in analyzing and designing the pipe network systems and to discuss effects of water hammer pressures.
3	Use the concepts of uniform and critical flow through open channels, design of efficient channel sections and application of specific energy concept.
4	Understand gradually varied flow analysis and its computation, and its application in open channel flow.
5	Understand and apply basics principles related to turbines & Pumps in water Resources planning

SYLLABUS

Unit No.1			
Real Fluid Flow:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Viscous Flow: Reynold's experiment, viscous flow through a circular pipe, velocity and shear stress distribution, Hazen poisuillee equation	**02**		**1**
Boundary layer concept: Nominal thickness, displacement thickness, momentumthickness of the boundary layer: Boundary layer along a thin plate and its characteristics; Laminar boundary layer; turbulent boundary layer; laminar sub-layer: separation of boundary layer on plane and curved surfaces.	**03**		**1**
Real, Incompressible Fluid Flow Around Immersed Bodies: General definition of drag and lift; flowpast plates, cylinders and spheres; drag on sphere; drag on sphere, cylinder and flat plate	**03**		**1**
	08		
Unit No.2			
Flow through Pipes:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Hydraulically smooth and rough pipes: Frictional resistance to flow of fluid in smooth and rough pipes; Moody's chart; Darcy-Weisbach & Hazen-William's equation for frictional head loss; Hydraulic gradient	**07**		**2**

and energy gradient: Pipes in series and parallel; Branched pipes; Siphon; transmission of power through pipes; Hardy-Cross methods of pipe networks; Water-hammer, pressure head due to sudden closure of valve.			
	07		
Unit No.3			
Uniform Flow Through Open Channels	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
(A) General: Types of channel and their geometrical properties; Types of flow in open channel.	**03**		**3**
(B) Uniform Flow: Chezy's and Manning's equations; Hydraulically most efficient rectangular, triangular and trapezoidal sections; Computations of normal depth of flow, conveyance of channel, section factor for uniform flow, normal slope and normal discharge.	**03**		**3**
(C) Critical Flow: Specific energy and its diagram; alternate depths; Computations of critical depth, section factor for critical flow, critical slope; normal, critical slope, Specific force and its diagram; Conditions of critical flow.	**02**		**3**
	08		
Unit No.4			
Non Uniform Flow through Open Channel	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
(A) Gradually Varied Flow: Dynamic equation for GVF; Classification and characteristics of surface profiles; direct Step method of computing profile length.	**02**		**4**
(B) Rapidly Varied Flow: Definition of hydraulic jump; Equation of hydraulic jump in horizontal, rectangular channel; Length & height of jump; Energy loss in jump classifications of jump	**03**		**4**

Concept of Impact of Jet			
Force exerted on stationary and moving plate and curved surface, concept of velocity triangles	**02**		**4**
	07		
Unit No.5			
Fluid Machinery	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
(A) Turbines: Definition: Gross and net heads; different efficiencies; Classification of turbines; component parts and working principles; selection of turbines on the basis of head and specific speed.	**02**		**5**
(B) Reciprocating Pumps: Components parts, working principle, Work done of single & double acting pumps; Negative slip, Air vessels-Working principle and necessity, indicator diagram	**02**		**5**
(C) Centrifugal Pump: Component parts; working principle; Static and manometric heads; different efficiencies; Priming & priming devices, Specific speed; Theoretical aspects of multistage pumps; Trouble & remedies; operating characteristics curves.	**03**		**5**
	07

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
25 Marks	**25 Marks**	**25 Marks**	

List of Experiments- (Minimum 8 experiments should be performed)

1. Determination of Frictional factor of a pipe line
2. Determination of minor losses through a pipe system
3. Determination of critical slope of an open channel
4. Study on Main characteristics of a centrifugal pump
5. Study on operating characteristics of a reciprocating pump
6. Study on operating characteristics of a centrifugal pump
7. Study on main characteristics of reciprocating pump
8. Analysis of Hydraulic jump in open channel
9. Determination of coefficient of impact of jet
10. Study of characteristics of a Pelton wheel
11. Study of characteristics of a Francis Turbine
12. Study of Reynolds's experiment
13. Determination Chesy's and Manning constants
14. Analysis of a Water Distribution network by Hardy cross method

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**4 Hr**

Course Objective	
1	To understand phenomenon's of design concepts and learning various codes related to RCC design.
2	To understand the structural behavior of steel and concrete.
3	To apply conventional methods for design structural components of building.

Course Outcome	
After completion of syllabus student able to	
1	Understand the fundamental concepts of working stress method as per IS 456- 2000 and Pre-stressed concrete method.
2	Apply the fundamental concepts of limit state method on limit state of serviceability
3	Analyze the fundamental concepts of limit state of collapse in flexure, Shear & Bond as per IS 456-2000.
4	Evaluate the fundamental concepts of limit state of collapse in compression and design of footing as per IS 456-2000.
5	Design of Simply supported Two-way slab

SYLLABUS

Unit No.1			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction to the Working Stress Method of RCC design. Basic concept in design for flexure, assumptions, design constants. Analysis of the rectangular section. (Balanced, under–reinforced and over– reinforced sections). **Introduction to Prestress Concrete:** Properties of high grade materials, concepts of prestress concrete, method of pre-stressing, losses in pre- stressing. Various systems for pre-stressing with particular reference to Freyssinet, Magnel Blatton and Giffod Udall system	**07**		1
	07		
Unit No.2			
Introduction to Limit State Design: Concept of limit state design and philosophy. Characteristic values, partial safety factors, stress strain relationship stress block parameters, failure criteria, types and properties of reinforcement, limit state of Serviceability and limit state of collapse. Limit states of durability **Limit State of serviceability**: **Causes and control of cracking**: Crack in plastic concrete at early	**10**		**2**

age, cracks due to temperature and shrinkage, restrain induced cracks, cracks due to loading. Needs for crack width control. Moment– curvature relationship, deflection control of beams and one way slabs. Limit state of collapse in flexure: Analysis and design of singly reinforced rectangular section. Limit state of Collapse in Flexure: Analysis & design of the Tee & L- beam section. Limit state of Collapse in Shear & Bond: Design of beam for shear , shear span, post cracking resistance, shear mechanism approach , shear failure modes and collapse loads, interaction of shear , flexure and axial force ,Check for bond.			
	10		
Unit No.3			
Limit state of collapse in compression: Analysis & design of short axially loaded column. Columns subjected to uni-axial bending, use of interaction curves.	**08**		**3**
	08		
Unit No.4			
Design of one –way, simply supported, single span and cantilever slabs and continuous slab / beam with IS coefficients,	**07**		**4**
	07		
Unit No.5			
Design of rectangular pad / slopped footing for axial load. Design of Simply supported Two-way slab	**04**		**5**
	04

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	The properties and importance of various constituent materials of concrete used in construction
2	The mechanical behaviour of engineering materials under compressive and tensile loads
3	The fundamentals of fracture mechanics and identify initiation and propagation of crack around stress-strain fields.
4	The standard testing procedures and assess engineering properties of construction materials.
5	The main goal of this course is to provide students with all information concerning principle, way of measurement, as well as practical application of mechanical characteristics.

Course Outcome	
After completion of syllabus student able to	
1.	Evaluate the role of materials in Civil Engineering
2.	Know the mechanical behaviour and properties of steel and concrete by standard testing procedures for identifying their performance
3.	Explain special materials, composite materials and use of new techniques in constructions for satisfying the future needs of industry.
4.	Exposure to a variety of established material testing procedures/techniques and the relevant codes of practice
5.	Evaluate and write a technical laboratory report.

Introduction and uses of cement, sand, aggregates	**01**		**1**
concrete, mortar and grouts, masonry mortars, rendering, cementations grouts	**02**		**1**
RCC, clay bricks, calcium silicate bricks, concrete blocks., rubbles, steel, mechanical properties of steel, different applications	**02**		**1**
Floor and roofing tiles, slates, timber, strength of timber, engineered wood products metals, glass for glazing, glass fibres, glass wool	**02**		**1**
Water proofing agents: any five water proofing agents, difference between wetting agents and water proof agent	**01**		**1**
	08		
Unit No.2 Basic Properties of Materials			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Importance of materials in civil engineering construction, types of materials such as ceramics, concrete, composites, optical /electronics materials, glass, metals, nano-materials, polymers and plastics, wood and other materials, comparison of strengths of various materials.	**04**		**2**
Some basic properties of materials such as temperature, energy, specific heat, thermal conductivity, coefficient of thermal expansion,	**03**		**2**

comparison for environmental impact, health and safety.			
	07		

Unit No.3 Special Materials

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Composite Materials: RCC, FRC, AAC (Autoclaved aerated concrete) blocks, WPC (Wood-plastic composites) Material, Cera sheets, 3D wall WPC panels, polymer based materials, steel/concrete composite bridge decks, fibre reinforced plastics structural insulated panels.	**03**		**3**
New Techniques in Constructions-Introduction, 3D printing, photo catalytic admixture, self-healing concrete, Biomaterials, zero cement concrete ,hemp lime, wood-glass epoxy composites, bamboo.	**04**		**3**
	07		

Unit No.4 Testing Procedures of Materials

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Material Testing, Machines and Equipment Requirements---Necessity of material testing, various testing methods, destructive tests, classification of destructive tests---static, impact and cyclic testing,non-destructive testing- its classification ,visual inspection, penetration test, ultrasonic test.	**03**		**4**
Testing Procedures for bricks, reinforcing steel, fine aggregates, coarse aggregates. Documenting the experimental program, including the test procedures, collected data, method of interpretation and final results.	**04**		**4**
	07		

Unit No.5 Testing and Evaluation Procedures of Materials

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Quality control- Use of test data/ testing reports in the material selection for various civil engineering projects /construction, Sampling, Acceptance criterion,	**04**		**5**
Code of practice and guidelines in this regards for Cements; Aggregates; Concrete (plain and reinforced); Soils; Bitumen and asphaltic materials; Timbers; Glass and Plastics; Structural Steel.	**03**		**5**
	07

CIVIL ENGINEERING MATERIALS, TESTING AND EVALUATION

BTCVE503P **Evaluation Scheme: (25-Internal/25-External)**

(P-2 Hrs/Week); Total Credits- 01

Minimum Eight Practical's from the given below list should be performed

Sr. No.	Details of Topic
1	**Tests on cement (Any Two)** Field test on cement, Fineness, Normal consistency, Initial and Final Setting times, Specific gravity, Soundness, Compressive strength,
2	**Tests on fine aggregate (Any Two)** Grain size distribution, Uniformity coefficient and fineness modulus, Specific gravity, Density, Void ratio, Bulking & Absorption
3	**Tests on coarse aggregate (Any Two)** Grain size distribution, Uniformity coefficient and fineness modulus, Specific gravity, Density, Void ratio, Absorption
4	**Concrete mix Design**
5	**Test on concrete by using IS code method (Any Two)** (a) Workability test, Slump test, Compaction factor test, Flow table test, Vee-Bee Consist meter, (b) Compressive strength, Split tensile strength, Flexure test on beams, Modulus of elasticity
6	Tests on bricks Crushing strength, water absorption and efflorescence
7	Tensile and Compressive strength of materials & concrete composites
8	Tests on polymers and polymer-based materials
9	Testing on Ceramic Floor, Wall Tiles, Paver-blocks, Mosaic tiles, IS code recommendations.
10	Study of non-destructive testing of concrete (NDT)
11	Field density of bituminous roads

Course Objective	
1	The objective of this course is to inculcate the sense of social responsibility among learners and to make them realize the significance of ethics in professional environment so as to make them a global citizen

Course Outcome	
After completion of syllabus student able to	
1	Understand basic purpose of profession, professional ethics and various moral and social issues.
2	Analyse various moral issues and theories of moral development
3	Realize their roles of applying ethical principles at various professional levels
4	Identify their responsibilities for safety and risk benefit analysis.
5	understand their constructive roles in dealing various global issues

Course Objective	
1	The objective of the course is to give awareness of practical application of various theoretical concepts.
2	The objective of the course is to enhanced the skills by using software in the field of Civil Engineering

Course Outcome	
After completion of syllabus student able to	
1	Understand organizational skills & professional practices
2	Interpret the communication skills of organizational members with each other
3	Analyze the structural problems by using STADD.PRO
4	Design the structural members by using STADD.PRO

SYLLABUS

Part A: Industrial Training

(25 Marks Internal and 25 Marks External)

After successful completion of industrial training of 2 to 3 weeks, students have to give Industry training report including certificate of completion of industrial training.

Part B: Professional Skill Training on STADD.PRO/Any Other

(25 Marks Internal and 25 Marks External)

STAAD PRO is structural analysis and designing software which is used by civil engineers to analyse and design the structure. It helps to reduce the calculations of Shear Force, Bending Moment and deflection of structure.

1. Practical Based on: Overview of Structural Analysis and Design, Introduction of STAAD. Pro V8i, STAAD Editor, Creating a New Project in STAAD.Pro, Units, Model Generation, Creating Nodes & Members, Select Menu, Insert Node, Add Beam, Modeling Methods, Long and Short Method Practice, Modeling Practice, Working On Examples.
2. Practical Based on: Support Specification, Member Property Specification, And Material Specification. Loading, Analyzing. Understanding Units, Working on examples, Understanding Material Properties, Understanding Various Types of Loads, and Implementing Loads.
3. Practical Based on : Performing Analysis, Pre Analysis Print, Post Analysis Print, Area Load, Floor Load.
4. Practical Based on: Wind Load Generation, Load Combination & Auto Load Combinations, Repeat Load Cases, Concrete Design.

5. Practical Based on : Concrete Column Design, Concrete Beam Design, Slab Design.

Student have to submit maximum four experiments on above contents (Selection of contents made by concern faculty) in 8 weeks.

Proposed amendment is "STAD Pro V8i or Any Other Equivalent Software may also be used for performing the same activities.

Subject Code	**BTCVE505T**	**Name of Subject: Elective – I (Advanced Structural Analysis)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15 Marks for sessional examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	To provide the knowledge about strain energy methods
2	To provide the knowledge about buckling of columns and analysis of arches
3	To analyse multi-storeyed frame structures using approximate methods
4	To develop an understanding, the basic principles of the matrix method of structural analysis
5	To analyse non-prismatic structures (beams and frames) using column analogy method
6	To introduce finite element method and provide knowledge of structural dynamics

Course Outcomes	
After completion of syllabus students will be able to	
1	Compute deflections in two dimensional structures using Strain energy method
2	Understand response of long columns
3	Use the approximate method for analysis of multi-storied frame structures
4	Understand Flexibility matrix method and application of column analogy
5	Understand the concepts related to structural dynamics & finite element method

Course Objective	
1	To determine the properties, functions and applications of various geosynthetic materials.
2	To impart knowledge about manufacturing methods.
3	Introduce to the students, Mechanism, improvement of Bearing capacity.
4	To impart knowledge about applications and functions of geosynthetics.
5	To design reinforced soil structures.

Course Outcome	
After completion of syllabus student able to	
1	To understand types of geosynthetics and its techniques to use properly in suitable construction site.
2	Understand the different functions of Geosynthetics .
3	Understand the applications of geosynthetics in Civil engineering field.
4	Study and identify about various reinforced soil structures.
5	Understand reinforced soil embankments.

SYLLABUS

Unit No.1

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction and Soil-water-environment interaction :	**01**		**1**
Introduction to geo-environmental Engineering,	**01**		
Soil-water-environment interaction relating to geotechnical problems,	**01**		
Waste:-source, classification and management of waste,	**01**		
Physical, chemical and geotechnical characterization of municipal solid waste,	**01**		
Impact of waste dump and its remediation	**01**		
	06		

Unit No.2

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Geotechnical application of waste and disposal:	**01**		**2**
Geotechnical use of different types such as Thermal power plant waste,	**01**		
Municipal Solid Waste, mine waste,	**01**		
Industrial waste.	**01**		
Waste disposal facilities,	**01**		

Parameters controlling the selection of site for sanitary and industrial landfill.	**01**		
Site characterization. MoEF guidelines.	**01**		
	07		

Unit No.3

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Landfill Components:Landfill layout and capacity, components of landfill and its functions.	**01**		**3**
Types and functions of liner and cover systems,.	**01**		
Compacted clay liner, selection of soil for liner, methodology of construction	**02**		
Leachate, Gas Management and Geosynthetics: Management of Leachate and gas.	**02**		
Various components of leachate collection and removal system and its design. gas disposal/utilization. Closure and post closure monitoring system,	**01**		
Geosynthetics- Geo membranes - geosynthetics clay liners -testing and design aspects.	**02**		
	09		

Unit No.4

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Soil remediation: Investigation of contaminated soil, sampling, assessment.	**02**		**4**
Transport of contaminants in saturated soil	**01**		
Remediation of contaminated soil- in-situ / exit remediation, bio remediation,	**01**		
thermal remediation, pump and treat method,	**01**		
phyto remediation and electro-kinetic remediation	**01**		
	06		

Unit No.5

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Variation in Engineering properties of soil	**02**		**5**
atterberg limit, shear strength,	**01**		
Permeability and swelling due to change in environment/pore fluid.	**02**		
	05

Sem: V	**Total HoursDistribution per week**		
Total Credit: 3	**Lecture : 3 Hours**	**Tutorial//Activity(T/A): 0 Hrs**	**Practical(P): 0 Hrs**
Subject Code	**BTCVE505T**	**Subject: Advanced Building Materials (Elective-I)**	

Examination Scheme			
Internal Marks-	**University**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (l5marks. for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hrs**

Course Objectives	
This course will enable students to	
1	Understand composition and microstructure of various materials used in civil engineering application.
2	Understand the manufacturing and types of mortars.
3	Understand engineering behavior of various materials.
4	Understand the use of advanced materials in construction projects.
5	Understand the sustainable materials used in construction.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Understand the structural, physical and long term performance of building materials used in construction.
2	Understand special mortars and admixtures used in Civil engineering applications.
3	Understand the properties of Ceramic materials in construction projects.
4	Understand the uses of polymeric materials in construction.
5	Understand green building concept and materials.

SYLLABUS

Details of Topic	**Allotment of Hours**		**Mapped with CONumber**
	L	**T/A**	**co**
UNIT NO.1(CONSTRUCTION MATERIALS)			
a) Classifications of Construction Materials.	**01**		**1**
b) Consideration of physical, Mechanical, thermo-physical Properties, Characteristics behaviour under stress.	**03**		**1**
c) Selection criteria for construction materials, waste products, reuse and recycling.	**03**		**1**
	07		
UNIT NO.2(MATERIALS FOR MAKING MORTAR AND CONCRETE)			
a)Lime manufacture, properties, hardening of lime, types of lime, lime concrete uses, cement, aggregates, water, characteristics, properties and uses of Pozzolana materials	**03**		**2**
b) Types of mortars, special mortars, properties and applications, admixtures	**03**		**2**
	06		

UNIT NO.3 (CERAMIC MATERIALS)			
a)Classification, Refractories, glass, glass wool.	**02**		**3**
b) Mechanical, thermal and electrical properties	**03**		**3**
c)Fire resistance materials, Uses and application.	**03**		**3**
	08		
UNIT NO.4 (POLYMERIC MATERIALS AND STEEL)			
a) Polymerization mechanism and depolymerisation.	**02**		**4**
b)Rubber and plastics, properties, effect of temperature on mechanical properties. Uses and application.	**03**		**4**
c) Types of structural steels, special steel, alloy steel, stainless steel, light gauge steel.	**02**		**4**
	07		
UNIT NO.5 (SUSTAINABLE MATERIALS)			
a)Green concepts in buildings, Green building materials ,Green building ratings IGBC and LEED manuals – mandatory requirements.	**04**		**5**
b)Rainwater harvesting &solar passive architecture. Environmental friendly and cost effective building technologies, Requirements for buildings of different climatic regions.	**03**		**5**
	07

Subject Code	**BTCVE505T**	**Name of Subject: Ground Water Hydrology (Elective-I)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To equip the students with capabilities required to explain groundwater occurrences, aquifer classification and aquifer properties in the many different geological environments.
2	Carrying out comprehensive hydrological flow systems analysis in groundwater systems.
3	Performing detailed groundwater balances, interpreting and working with the concepts of groundwater recharge, storage, and discharge.
4	Knowledge of the steady-state and transient groundwater flow processes and their physical description.
5	Application of analytical solutions to solve the groundwater management problems.

Course Outcome	
After completion of syllabus student able to	
1	Define groundwater and its occurrences, classify the aquifers and illustrate aquifer properties
2	Analyse the comprehensive hydrological flow systems in groundwater systems
3	Perform detailed groundwater balances, interpreting and working with the concepts of groundwater recharge, storage, and discharge
4	Interpret the steady-state and transient groundwater flow processes and their physical description
5	Solve the groundwater management problems

SYLLABUS

Unit No.1			
Details of Topic Introduction:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Ground water utilization & historical background, Role of groundwater in the hydrologic cycle, problems and perspectives, groundwater resources status in India, ground water budget.	**02**		**1**
Occurrence and movement of groundwater, Origin & age of ground water, rock properties affecting groundwater, groundwater column, zones of aeration & saturation	**02**		**1**
Aquifers and their characteristics/classification, groundwater basins & springs,	**02**		**1**
Darcy's Law, permeability & its determination, Dupuit's equation with assumptions, heterogeneity &anisotropy,	**02**		**1**
	08		
Unit No.2			
Details of Topic: Well Hydraulics:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Types of wells, methods of construction, tube well design, dug wells, pumps for lifting water, working principles, power requirement,	**01**		**2**
Steady Flow, Radial flow in confined and unconfined aquifers, pumping test	**02**		**2**
Unsteady Flow, General equation, derivation; thesis method, Cooper and Jacob method, Chow's method	**02**		**2**
Leaky aquifers (only introduction), interference of well, image well theory.	**02**		**2**
	07		

Unit No.3			
Details of Topic: Surface and Subsurface investigations of Groundwater:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Geologic methods, remote sensing, geophysical exploration,	**01**		**3**
Electrical resistivity and seismic refraction, logging techniques, test drilling & ground water level measurement	**02**		**3**
ARTIFICIAL GROUND WATER RECHARGE: Concept & methods of artificial ground water recharge,	**02**		**3**
Recharge mounds & induced recharge, wastewater recharge for reuse, water spreading.	**01**		**3**
	06		
Unit No.4			
Details of Topic: POLLUTION AND QUALITY ANALYSIS OF GROUND WATER	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Municipal /industrial /agricultural /miscellaneous sources & causes of pollution,	**02**		**4**
Attenuation/ underground distribution / potential evaluation of pollution, physical /chemical /biological analysis of ground water quality, criteria & measures of ground water quality,	**03**		**4**
Ground water salinity & samples, graphical representations of ground water quality.	**03**		**4**
Ground Water Development: Conjunctive use, necessity, techniques and economics.	**02**		**4**
	10		
Unit No.5			
Details of Topic : Modelling and Management of Groundwater:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Ground water modelling through porous media /analog / electric analog / digital computer models,	**03**		**5**
Ground water basin management concept, hydrologic equilibrium equation, ground water basin investigations	**02**		**5**
Data collection & field work, dynamic equilibrium in natural aquifers, management potential & safe yield of aquifers, stream-aquifer interaction.	**03**		**5**
	08

Course Objective	
1	To impart knowledge of Advanced surveying methods.
2	Develop skill to use advance surveying instruments and analyse data
3	Understand different errors and elimination of errors
4	To make aware of the use of modern surveying instruments for real life problems.

Course Outcome	
After completion of syllabus student able to	
1.	Understand Remote Sensing, terms involved in Remote Sensing and its applications.
2.	Apply drone and LiDAR technology for surveying
3.	Process digital images and interpret images using different tools.
4.	Understand Geographical concepts and terminology involved in GIS and its Applications.
5.	Handle GPS and DGPS for surveying

SYLLABUS

Unit No.1 Remote Sensing			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction and definition of remote sensing terms,remote sensing system, principles of remote sensing,	**02**		**1**
Interaction of EMR, Fundamentals of aerial photography, platforms and orbits,	**02**		**1**
Sensors,data products, principles of visual interpretation, principles and uses;	**02**		**1**
Thermal remote sensitize, microwave remote sensing.	**02**		**1**
	08		
Unit No.2 UAV Drone & LiDAR			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Types of Drone and its applications	**01**		**2**
LiDAR Techniques and its types	**02**		**2**
Application of Drone Technology for large area mapping	**02**		**2**
Generation of 3D data from Drone/LiDAR and preparation of DSM,DTM and detailed contour maps	**03**		**2**
	08		

Unit No.3 : Image Interpretation			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Principles of interpretation of aerial and satellite images,	**02**		**3**
Equipments and aids required for interpretation,	**02**		**3**
Ground truth collection and verification,advantages of multi date and multi band images,	**02**		**3**
Digital image processing; introduction, image enhancementtechniques, digital image classification.	**02**		**3**
	08		
Unit No.4 Geographic Information System (GIS)			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Geographic Information System (GIS)- Definition of GIS,Geographical concepts and terminology	**02**		**4**
Components of GIS, Data acquisition, Raster and vector formats, scanners and digitizers.	**03**		**4**
Advantages of GPS and GIS in the storage of the matic information extracted from remotely sensed image	**03**		**4**
	08		
Unit No.5 Global Positioning System (GPS) & Differential GPS			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction to navigation and positioning Geodesy;	**01**		**5**
Geospatial reference systems, overview of GPS;	**01**		**5**
DGPS Techniques Post Process Kinematic and Real Time Kinematic technique.	**02**		**5**
DGPS Triangulation and closing techniques	**02**		**5**
Advance DGPS applications	**02**		**5**
	08

Course Objective	
1	To understand the design concepts and learning various codes related to advanced reinforced concrete structure.
2	To understand the structural behavior of steel and concrete.
3	To apply conventional methods for design structural components of building.

Course Outcome	
After completion of syllabus student able to	
1	Understand the behaviour and failure modes of different RC structural members
2	Analyze and apply the results in designing various RC structural members.
3	Apply the knowledge and skills in practical problems
4	Understand the relevant software and use the same in the analysis and design of RC members.

30 Marks (l5 Marks. for Sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To know the in-depth knowledge of various failures mechanism related to earth retaining structures.
2	To understand the types of retaining wall, stability of retaining walls.
3	To understand sheet pile and cofferdam, method of construction and distribution of earth pressure.
4	To understand the historical failures of geotechnical structures.
5	To understand the effect of water table on slopes.

Course Outcome	
After completion of syllabus student able to	
1	Think logically for mechanism of earth retaining structures.
2	Differentiate different types of retaining wall and Understand the engineering concepts of stability of retaining walls.
3	Understand about sheet pile and cofferdam and best suitable techniques for construction.
4	Gain an experience in from historical failures of geotechnical structures.
5	Gain the knowledge of effect of water table on slopes.

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR
FACULTY OF SCIENCE & TECHNOLOGY
B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: V	**Total Hours Distribution per week**		
Total Credit: 3	**Lecture (L): 03 Hrs**	**Tutorial/Activity (T/A): 0 Hrs.**	**Practical (P): 0 Hrs.**
Subject Code	**BTCVE506T**	**Name of Subject: Climate Change and its Mitigation (Elective-II)**	

Examination Scheme			
Internal Marks:	**Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	Students should be able to get knowledge about Climate system, its changes and causes
2	Students should able to learn about Green house gases and its chemistry, sources, effects & instruments used for quantification
3	Students should able to learn about the impacts of global climate change
4	Provide the knowledge of clean technology and alternate energy sources
5	To introduce the students about the mitigation of climate change

Course Outcome	
After completion of syllabus student able to	
1	To be able to understand the problem of economics of energy – environmental interaction with respect to global climate change
2	To be in a position to analysis Green house effect
3	To be in a position to analyze impact of climate change
4	To be in a position to understand the clean technology and alternate energy sources
5	To demonstrate in producing research/project report on mitigation strategies for global climate change.

SYLLABUS

Unit No.1 Earth's Climate System

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Introduction to Climate Change; History and Trends of Climate	02		1
Atmosphere – weather and Climate	01		
Causes of global and regional climate change	01		
climate parameters – Temperature, Rainfall, Humidity	01		
Wind – Global ocean circulation and its effect	01		
Carbon cycle	01		
	07		

Unit No.2 Greenhouse Gases

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Introduction and effect of Carbon dioxide, methane, nitrous oxide, water vapor, ozone and chlorofluorocarbons	02		2
Chemistry of greenhouse gases	01		
Sources and sinks, their cycle in atmosphere	01		
Radiative forcing	01		
Effects on plants and animals	01		
instruments used for quantification	01		
	07		

Unit No.3 Impacts of Global Climate Change			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Impacts of Climate Change on various sectors – Agriculture, Forestry	**02**		**3**
Methods and Scenarios, changes in agricultural production	**02**		
Impact on Human Health, Industry and society	**01**		
Spread of epidemics and Risk of Irreversible Changes.	**01**		
Traditional practices to cope with climate change impacts	**01**		
	07		
Unit No.4 Waste to Energy, Clean Technologies and Greener Fuels			
Details of Topic :	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction to MSW & Bio waste, Biomedical, Industrial waste, International and Regional cooperation.	**02**		**4**
Alternate Energy: Hydrogen, CBS, Bio-fuels, Solar Energy, Wind, Hydroelectric Power	**02**		
Examples of future Clean Technologies, Biodiesel, Natural Compost, Eco- Friendly Plastic	**02**		
Study of waste to energy projects	**01**		
	07		
Unit No.5 Climate Change Mitigation			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Climate change response measures: definition and evolution..	**02**		**5**
Introduction to mitigation of GHGs and stabilization scenario	**01**		
characteristics of mitigation in regional and national context	**01**		
mainstreaming climate change in development agenda	**01**		
short-term mitigation options Role of fossil fuels in climate change	**01**		
Role of Governments, industries, and individuals	**01**		
	07

B.TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: V	**Total Hours Distribution per week**		
Total Credit: 3	**Lecture : 3 Hours**	**Tutorial//Activity (T/A): 0 Hrs**	**Practical (P): 0 Hrs**
Subject Code:-	**BTCVE506T**	**Subject: - Advanced Concrete Technology (Elective-II)**	

Examination Scheme			
Internal Marks-	**University**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(l5marks. for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	To know different types of cement as per their properties for different field applications, properties of Aggregates and Admixture
2	To understand the knowledge of Special Concrete To know tests on concrete in plastic and hardened stage as well as behavior of concrete structure
3	To understand Design economic concrete mix proportion for different exposure conditions and intended purpose.
4	To understand the behavior and strength of concrete structure.
5	To understand the concept of durability and testing of concrete

Course Outcomes	
After completion of syllabus, students would be able to	
1	Think logically for development Concrete technology application in field of Civil Engineering
2	Differentiate special concrete from conventional concrete Gain an experience in the implementation of Concrete Materials on Engineering concepts which are applied on Construction Fields
3.	Understand the process of mix design of concrete.
4.	Gain an experience in the implementation of Concrete Materials on Engineering concepts which are applied on Construction Fields.
5.	To Understand the various factors affecting the concrete and Advanced Non-Destructive Testing Methods.

SYLLABUS

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
UNIT NO.1 INTRODUCTION TO CONCRETE			
Historical background, composition of concrete, general note on strength mechanism, recent practice and future trends	**01**		**1**
Cement - Chemical composition, hydration, heat of hydration, hydrated structure, various types of cement, grades of cement, testing, Hydration Process and Hydrated Cement Paste of blended cement, of cement as per Indian standard.	**03**		**1**
Aggregates - Utility in concrete, classification, effect of geometry & texture, strength, mechanical properties, moisture content, water absorption, bulking of sand, deleterious substances, sieve analysis,various grading and grading requirements	**03**		**1**
Water - General Requirements & limiting values of impurities	**01**		**1**
	08		
UNIT NO.2 SPECIAL CONCRETE AND CONCRETING TECHNIQUES			
a)Concrete with difference cementatious materials: fly ash, GGBS, Silica fume. b) Concrete with different Aggregates: No fines, high weight, gap graded, Recycled Aggregate,Auto clave aerated concrete.	**03**		**2**
c) Modified property: high density, high performance, ultra rapid hardening concrete, transportation concrete, Fiber reinforcement concrete. d) Techniques: RMC, Underwater concrete , Shot crete, nano concrete.	**03**		**2**
	06		

UNIT NO.3 DESIGN OF CONCRETE			
Concept of Design of concrete, Quality control (field and statistical) Indian Standard Method, Comparison with British and .American Method of Mix Design. Acceptance criteria..	**02**		**3**
Design of High Strength Concrete Mixes, Design of Light Weight Aggregate Concrete Mixes, Design of Fly Ash Cement Concrete Mixes, Design of High Density Concrete Mixes, Standards, Specifications and Code of Practice.	**05**		**3**
	07		
UNIT NO.4 BEHAVIOR AND STRENGTH OF CONCRETE			
Failure modes in concrete, type deformation stress strain relation and modulus of elasticity, Shrinkage cause, Factors Affecting and control, creep, causes, Factores influencing and effects.Effects of temperature.	**04**		**4**
Compressive strength, Tensile strength, Fatigue strength, and impact strength, Factors influencing strength of concrete..	**03**		**4**
	07		
UNIT NO.5 DURABILITY AND TESTING OF CONCRETE			
Water As An Agent Of Deterioration, Permeability Of Concrete, Classification of Causes of Concrete Deterioration, Deterioration By Surface Wear/Abrasion, Freezing And Thawing of Concrete, Alkali-Aggregate Reaction (Alkali-Silica Reaction / Alkali-Carbonate Reaction), Deterioration By Fire,Guide To Durable Concrete	**04**		**5**
Advanced Non-Destructive Testing Methods: Ground Penetration Radar, Probe Penetration, Pull Out Test, Break off Maturity Method, Stress Wave Prorogation Method, Electrical/Magnetic Methods, Nuclear Methods And Infrared Thermograph, Core Test	**04**		**5**
	08

Sem: V	**Total Hours Distribution per week**		
Total Credit: 03	**Lecture (L): 3 Hrs**	**Tutorial/Activity (T/A): 0 Hr.**	**Practical (P): 0 Hrs.**
Subject Code	**BTCVE506T**	**Name of Subject: Flood Control and Drainage (Elective-II)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15marks for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
This course will enable students to:	
1	Understand the Concept of Flood, its effect and Causes.
2	Understand various methods of Flood Mitigation
3	Understand clearly flood routine and its effect in flood management and control
4	Understand the Problems of Drainage system in urbanization and apply the knowledge in operation and maintenance of Urban drainage system.
5	Familiarize with the concepts of systems for drainage of irrigation lands.

Course Outcome	
After Studying this course, Students will be able to:	
1	Understand the role and responsibility of engineers in Flood Mitigation.
2	Understand the role and responsibility of engineers in Estimation of Design Flood
3	Learn and apply the knowledge of GIS, remote Sensing in Natural Hazard Mitigation.
4	Apply the Concept in Operation and Maintenance of Urban Drainage System.
5	Apply the knowledge of pattern of Drainage system at Irrigation area.

Course Objective	
1	Students should be able to explain and describe various terms in railway engineering.
2	Students should be able to explain, discriminate and design various geometric features of railway track.
3	Students should be able to define and describe the construction and maintenance steps of railway track.
4	Understand the influence of railway transportations in the society.
5	Understand the cooperation, interaction & philosophy of railway safety.

Course Outcome	
After completion of syllabus student able to	
1	Explain Components of Railway Track, different Railway Gauges
2	Design track Gradients as per given requirements
3	Discuss various Types of Track Turnouts
4	Explain Interlocking and modern signal system
5	Describe Surface Defects on Railway Track and Their Remedial Measures

Course Objective:	
1	To understand the properties of various rolled and built-up sections.
2	To understand the possible failure modes of structural members.
3	Applying various checks for strength assessment and design the member.

Course Outcome	
After completion of syllabus student shall be able to	
1	Use the knowledge of structural properties in assessing its strength and understand design philosophy.
2	Apply the knowledge of various techniques in analysing and design the members subjected to axial loading.
3	Make use of knowledge of analysis in structural planning and design of various components of building subjected to bending.
4	Apply engineering concept to design members subjected to complex nature of loading.
5	Make use of knowledge to design footings.

B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VII	**Total Hours Distribution per week**		
Total Credit: 03	**Lecture (L): 00 Hrs.**	**Tutorial/Activity (T/A): 0 Hrs.**	**Practical (P): 06 Hrs.**
Subject Code	**BTCVE706P**	**Name of Subject: Project Work Phase-I**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
50 Marks	**50 Marks**	**50 Marks**	**--**

Course Objective	
1	The objective of the course is to give awareness of practical application of various theoretical concepts in the field of Civil Engineering.
2	The objective of Project Work Phase I is to enable the student to take up investigative study in the broad field of Civil Engineering, either fully theoretical/practical or involving both theoretical and practical work to be assigned by the Department on an individual basis or minimum two/ maximum six students in a group, under the guidance of Project Guide.

Course Outcome	
After completion of syllabus student able to	
1	Understand organizational skills & professional practices
2	Interpret the communication skills of organizational members with each other
3	Collection of data for analyze/design the Civil Engineering problem by using appreciate methodology in a team work.

SYLLABUS

Part A: INTERNSHIP

(25 Marks Internal and 25 Marks External)

After successful completion of internship of 3 to 4 weeks, students have to give internship report.

Part B: SEMINAR

(25 Marks Internal and 25 Marks External)

A group of students is expected to take up a project from Civil Engineering field which is to be started in Semester VII and to be completed in Semester VIII.

The project work may include,

- Experimental analysis / verification,
- Development of design methods and verification,
- Design and fabrication of a model for a civil engineering project,
- Design for civil engineering structures and preparation of working drawings,
- Developing a software for analysis and / or design of decision making in civil engineeringand management practice
- Technical and / or economic feasibility study
- Study on new materials / methodology for construction

The students may be asked to work in groups with not more than Six students in each group.

Basic study through review of literature on the topic selected shall be completed. The scope of the project, necessary data, sources of such data etc. shall be identified. The group of students has to prepare a brief report on the work done during the semester and is to be submitted. The report should at least include Introduction, Aim and objective of the project, scope of the project, methodology, and review of literature and reference list. The group shall prepare and present a seminar based on this work.

Sem:VII	**Total Hours Distribution per week 3-0-0**		
Total Credit:03	**Lecture (L):- 03 Hrs**	**Tutorial/Activity (T/A):- 00Hrs.**	**Practical (P):00 Hrs.**
Subject Code	**BTCVE702T**	**Name of Subject: Advanced RCC Design (Elective-IV)**	

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**4 Hrs**

Course Objective	
1	To understand the philosophies of design of reinforced cement concrete and to justify this is the best
2	To know design of advanced structural elements with safety, stability and economical way
3	To study of provisions in IS 1893 and IS 456 for design of structures

Course Outcome	
After completion of syllabus student able to	
1	Understand the conceptual design of overhead circular service reservoirs.
2	Analysis and design of Highway Bridge: Slab type and Girder type
3	Analyze and Design building frames using Limit state Method.
4	Select the parameters in beam theory for design cylindrical shells
5	Design Silos using Limit state Method.

Sem: VII	**Total Hours Distribution per week**		
Total Credit: - 03	**Lecture : 3 Hours**	**Tutorial//Activity(T/A): 0Hrs**	**Practical(P): 0Hrs**
Subject Code	**BTCVE702T**	**Subject: Advance Soil Engineering (Elective-IV)**	

Examination Scheme			
Internal Marks-	**University**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (l5marks. for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3Hours**

Course Objectives	
1	To understand the physical of soil and its behavior under external loads and for different site conditions.
2	To understand the Engineering properties of soil and its behavior under external loads and for different site conditions.
3	To characterize stress-strain behavior of soils, the failure criteria and to evaluate the shear strength and compressibility parameters of soils.
4	To understand the effective stress phenomenon in different types of soil.
5	To understand one dimensional and three dimensional consolidation characteristics and secondary consolidation in clays.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Estimate the amount of consolidation and settlement and time required for settlement under a given load.
2	Understand the effects of seepage on the stability of structures and calculate stresses that influence soil behavior.
3	Ability to analyze the stability of natural slopes safety and sustainability of the slopes, design of retaining structures, reinforced earth wall, etc.
4	Understand basics principles of flow and soil permeability through porous media, Construct flow nets for water flow calculations.
5	Design deep foundation systems under different loading and soil conditions.

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	**T/A**	**CO**
UNIT NO.1 Consolidation			
Compressibility and Consolidation: One dimensional compression, Oedometer test, parameters – coefficient of volume change, constrained modulus, compression index, swell or unloading, maximum past consolidation stress, Over consolidation ratio.	**03**		**1**
Primary and secondary compression, consolidation – One, two and three dimensional problems, Consolidation of partially saturated soils, Creep/Secondary Compression in soils.	**03**		**1**
	06		
UNIT NO.2 Soil strength			
Soil strength: Effective stress law for saturated and partially saturated soil, pore pressure measurements in partially saturated soils, effective stress concept, effect of intermediate principal stress.	**03**		**2**
Effect of rate of stress, stress dilatancy theory, plane strain and stress path Hvorslov shear strength parameters.	**02**		**2**
	05		
UNIT NO.3 Earth pressure			
Earth pressure – Rankine, Coulomb and Graphical Methods, Retaining walls structures.	**03**		**3**
Gravity cantilever and counter fort retaining walls: Stability checks and design.	**02**		**3**
	05		

UNIT NO.4 Liquefaction of soils			
Liquefaction mechanism, factors affecting liquefaction, liquefaction of cohesionless soils and sensitive clays, liquefaction susceptibility.	**03**		**4**
	03		
UNITNO.5 Machine Foundation			
Introduction: Types of machines, Types of machine foundations, Modes of vibrations, General requirements of machine foundation, General criteria for design, permissible amplitude	**02**		**5**
Analysis & Design of Machine foundation: Elastic homogeneous half space and lumped parameter solutions, analysis and design of foundations for reciprocating and impact type machines, turbines, effect of machine foundation on adjoining structures.	**03**		**5**
vibration isolation& control: Force isolation & motion isolation, Methods of isolation in machine foundations Isolating materials and their properties Bearing capacity of foundations: Introduction to bearing capacity of dynamically loaded foundations	**03**		**5**
	08

B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VII	**Total Hours Distribution per week**		
Total Credit: 03	**Lecture (L): 3 Hrs**	**Tutorial/Activity (T/A): 0 Hrs.**	**Practical (P): 0 Hrs.**
Subject Code	**BTCVE702T**	**Name of Subject: Design of Hydraulic Structures (Elective-IV)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To study the fundamental concept , design and maintenance of hydraulic structures
2	To get a knowledge of various types of dam
3	Study of canal regulation, canal headwork and cross-drainage.
4	Study of design of spillway and energy dissipaters
5	To develop understanding of the basic principles and concepts of analysis and design of hydraulic structures.

Course Outcome	
After completion of syllabus student able to	
1	Understanding the design of dam section and its usefullness.
2	To know the types of canal, canal headworks, cross-drainage and canal regulator works
3	Application of the canal, dam and spillway in civil engineering structures.
4	Be able to select the type of storage works, analysis, design of various components part of diversion head works.
5	To know the concept, analysis, design and field application of various anal structures.

SYLLABUS

Unit No.1 Reservoir Planning & Earthen Dam			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Reservoir Planning: Investigations, Capacities, Zones of storage, Mass Inflow and Mass Demand curves, Life of Reservoir, River training work	**02**		**1**
Earthen Dam: Nature and classification of soil, Types, causes of failure and design criteria, Description of component part of earthen dams foundation, construction methods, foundation requirements, typical earth dam sections, seepage through body of earthen dam and drainage arrangements, seepage control, Phreatic line in earth dam, Stability of foundation against shear	**05**		
	07		
Unit No.2 Gravity Dam			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Gravity dams: Defination**,** selection of site, Design Criteria, forces	**07**		**2**

acting on gravity dams, Theoretical & practical profile of gravity dam, low and high gravity dams, stability analysis, , evaluation of profile by method of zoning, foundation treatment, construction joints, galleries in gravity dams.			
	07		
Unit No.3 Spillway & Energy Dissipaters			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Spillways : Necessity, components and classification, Estimation of spillway design flood,design principle, cavitation on spillway, Ogee spillway and its design, design of outlets and rating curves, emergency spillways	**03**		**3**
Energy Dissipators: Principle, Tail water and Jump height curve, spillway gates and their design principles, Design of canal regulating structures, Design criteria for Channel transitions, Hind's method for design of transition, Design of Sarda type Falls, Design of pucca canal trough.	**04**		**3**
	07		
Unit No.4 Structures on Pervious formations			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Bligh's creep theory and limitations, Khoslas's theory of independent variable,Khosla's corrections, design of surface and subsurface weirs, Barrages :design of waterways and crest levels,design of impervious floors and protection works.	**07**		**4**
	07		
Unit No.5 Canal Structures			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**

	L	T/A	CO
Canal outlets-Review of requirements and types-modular, semi modular, non-modular outlets- design of direct sluice **Design of Cross drainage works** : Necessity,types of cross drainage works, selection of suitable type of cross drainage works, types of aqueducts, design of aqueduct, syphon,super passage and canal syphon **Design of Regulator**: Head regulator and cross regulator	**09**		**5**
	09

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15 Marks for sessional examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To introduce the students with the principles and practice of transportation engineering which focuses on traffic and transportation engineering and highway engineering.
2	To enable the students to have a strong analytical and practical knowledge of planning, designing and solving the transportation problems.
3	To introduce the recent advancements in the field of sustainable urban development, traffic engineering and management, systems dynamics approach to transport planning, highway design and construction, economic and environment evaluation of transport projects.
4	To strength the student knowledge and technical knowhow to be efficient transport engineers.

Course Outcome	
After completion of syllabus student able to	
1	Students should be able to Define and describe various traffic studies and traffic characteristics
2	Students should be able to describe terms related to highway capacity and have knowledge of statistical tools in traffic engineering
3	Students should be able to explain various theories related to traffic flow

30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**4 Hours**

Course Objective	
1	Analyse the forces and stresses acting on different steel structures.
2	To understand the possible failure modes of structural members.
3	Applying various checks for strength assessment and design the member.

Course Outcome:	
After completion of syllabus student shall be able to	
1	Analyse loads acting on bridge and design of members.
2	Analyse industrial building members and their design.
3	Analyse forces acting on steel chimney and design of chimney superstructure.
4	Analyse loads acting on liquid storing tanks and their design.
5	Analyse loads actin on storage vessels and their design.

Internal Marks-	**University**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (l5marks. for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3Hours**

Course Objectives	
1	Design a shallow foundation subjected to eccentric & inclined loads.
2	Design of deep foundation i.e., piles based on settlement & bearing capacity criteria
3	To impart importance of raft foundation.
4	Narrate the importance of apparent earth pressure diagrams in design of sheet piles & braced cuts.
5	Design of foundations in Expansive soils.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Analyze the bearing capacity of shallow foundations;
2	Analyse and design pile foundations.
3	Evaluate the importance of raft foundation and principles of design for buildings and tower structures
4	Analyse and design Sheet piles and cofferdams.
5	Students should be able to understand the concept of foundations in expansive soils.

Subject Code	**BTCVE703T**	**Name of Subject: Air Pollution & Solid Waste Management (Elective-V)**	

Examination Scheme			
Internal Marks:	**Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives:

1.	The course will provide students knowledge regarding different aspects of air pollutants, its sources and effects, meteorological parameters, air sampling
2.	The course will prepare students to design equipments for air pollution to reduce its impact on environment
3	The course will provide students the knowledge regarding problems arriving in handling large amount of solid waste generated, its collection, transportation, and processing
4	The course will prepare students to learn emerging technologies for air pollution control, design safe collection and disposal methods.

Course Outcomes:

1.	Students will be able to understand different aspects of air pollutants, its sources and effects on man & materials and Meteorological parameters
2.	Students will be able to understand methods of air sampling & design equipments for air pollution to reduce its impact on environment
3	Students will be able to understand problems arriving in handling large amount of solid waste generated
4	Students will be able to understand problems arriving in its collection, transportation, and processing & to design safe collection and disposal methods
5	Students will be able to learn emerging technologies for air pollution control.

CO3	2					3	3					1
CO4		1				3	3					1
CO5			3			3	3					1

1. Low 2. Medium 3. High

UNIT-I (07 Hrs.)

Introduction to air pollution: Definition, atmosphere & its zones, Classification and sources of air pollutants, Impacts of air pollution on human health, vegetation, animals, building materials, structures, and atmosphere, soil and water bodies, Global and regional environmental issues of air pollution: Ozone depletion, Climate change, Global warming, Acid rain.

Meteorological parameters: Primary and secondary parameters, atmospheric stability, plume behaviour. Wind rose diagram, Air Quality Index (AQI), Standards for air pollution (as per Indian Standards and CPHEEO),

UNIT-II (08 Hrs.)

Air sampling and measurement: Ambient air sampling and stack sampling, collection of particulate and gaseous pollutants, (adsorption, absorption, incineration, condensation), site selection criteria, methods of estimation. Stack height determination

Air pollution controls methods and equipments: Principles of control methods for particulates and gaseous pollutants, gravity settlers, electrostatic precipitators, bag filters, cyclones and wet scrubbers

UNIT-III (07 Hrs)

Introduction to solid waste management(SWM): Structure , necessity and responsibility, Sources, Quantity and quality, Sources of solid waste, classification and components, physical and chemical characteristics, per capita contribution, sampling and analysis

Collection and transportation of solid waste: Method of collection, equipment used for collection and transportation, transfer stations, optimization of transport route.

UNIT-IV (07 Hrs)

Solid waste processing: Methods of processing, merits and demerits of various methods, 3R concept

Disposal methods: Composting of waste, methods of composting, factors affecting composting Sanitary land filling: Site requirements, methods, leachate management

UNIT –V (07 Hrs)

Incineration: Principles of incineration, types of incinerators, advantages and disadvantages, Pyrolysis, Gasification, Refuse derived fuel(RDF), Biogas

Control of gases: Carbon Footprint, Emerging technologies and strategies to mitigate air pollution, Current challenges and way forward

Sem: VII	**Total Hours Distribution per week**		
Total Credit: 03	**Lecture (L): 3Hrs**	**Tutorial/Activity (T/A): 0 Hrs**	**Practical (P): 0 Hrs**
Subject Code	**BTCVE703T**	**Name of Subject: Precast and Modular Construction Practices (Elective-V)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15marks for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To understand the design principles related to prefabrication elements.
2	To obtain knowledge on the concepts of production, transportation, assembling & erection of precast buildings
3	To understand behaviour of structural components and joints.
4	To obtain knowledge of different equipment of precast construction practices.
5	To study different loads on the structural components.

Course Outcome	
After completion of syllabus student able to	
1.	Give knowledge of factors to be considered in the design of prestressed concrete structures
2.	Give knowledge of the design and manufacturing of Finnish precast concrete products
3.	Understand the difference between pre- and post-tensioned systems for structural behaviour
4.	Learn to consider specific features of precast concrete structures: connections, stability and prevention of progressive collapse, ductility
5.	Learn to consider the influence of time-dependency of materials on structural reliability.

Application of prestressing of roof members; floor systems two-way load bearing slabs, pre-stressed beam, Precast column -precast shear walls, Wall panels, hipped plate and shell structures.	**07**		**2**
	07		

Unit No.3			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Behaviour of structural components – Large panel constructions – Construction of roof and floor slabs – Wall panels – Columns – Shear walls.	**03**		**3**
Joints - Joints for different structural connections, effective sealing of joints for water proofing, provisions for non-structural fastenings, expansion joints in precast construction.	**05**		**3**
	08		
Unit No.4			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Production Technology - Choice of production setup, manufacturing methods, stationary and mobile production, planning of production setup, storage of precast elements, dimensional tolerances, acceleration of concrete hardening. Hoisting Technology - Equipment for hoisting and erection, techniques for erection of different types of members like beams, slabs, wall panels and columns, vacuum lifting pads.	**07**		**4**
	07		
Unit No.5			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Progressive collapse – Code provisions – Equivalent design loads for considering abnormal effects such as earthquakes, cyclones, etc., - Importance of avoidance of progressive collapse.	**07**		**5**
	07

Sem: VII	**Total Hours Distribution per week**		
Total Credit: 03	**Lecture (L): 3 Hrs.**	**Tutorial/Activity (T/A): 0 Hrs.**	**Practical (P): 0 Hrs.**
Subject Code	**BTCVE703T**	**Name of Subject: Hydropower Engineering (Elective-V)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15marks for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To impart the knowledge for understanding of various aspects of hydropower development
2	Demonstrate the ability to apply knowledge of mathematics, statistics, fluid mechanics, in design of penstocks, surge tanks and intakes
3	Understand the design of hydro power plant
4	Understand various types of Civil Engineering structures used in hydropower development and design aspects
5	Knowledge about electrical aspects of power unit and understand the importance of these items.

Course Outcome	
After completion of syllabus student able to	
1	To understand about the sources of water power and estimation of its potential
2	To learn the concept, design, investigation of power canals and its components
3	To understand the concept, design, investigation about various parts of power units.
4	To understand the concept, investigation about various parts of a power house.
5	To impart the knowledge about electrical aspects of power unit and understand the importance of these items.

Sem: VII	**Total Hours Distribution per week**		
Total Credit: 3	**Lecture (L): 3 Hrs**	**Tutorial/Activity (T/A): 3/0 hrs.**	**Practical (P): 0 Hrs.**
Subject Code	**BTCVE703T**	**Name of Subject: Bridge Engineering (Elective-V)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	Students should be able to choose the appropriate bridge type for a given project, and to analyses and design the main components of the chosen bridge.
2	To help the student develop an intuitive feeling about the sizing of bridge elements, ie. develop a clear understanding of conceptual design.
3	To understand the load flow mechanism and identify loads on bridges.
4	To develop an understanding of and appreciation for basic concepts in proportioning and design of bridges in terms of aesthetics, geographical location and functionality
5	Student should know about various types of loads on the bridges.

Course Outcome	
After completion of syllabus student able to	
1	To analyze the functional utility of bridges and their components.
2	To determine the forces acting on bridges and to calculate bending moment, shear force etc.
3	To understand the behaviour of components of bridge due to load and able to design it for safety and serviceability.
4	To understand the support conditions, the functional utility and use of bearings.

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To provide a coherent development to the students for the courses in sector of earthquake engineering
2	To design earthquake resistant structures as per IS 1893
3	To present the foundations of many basic engineering concepts related earthquake Engineering
4	To involve the application of scientific and technological principles of planning, analysis, design of buildings according to earthquake design philosophy.

Course Outcome	
After completion of syllabus student able to	
1	Understand the philosophy of earthquake resistant design.
2	Understand the concept of various effects on structure due to earthquake.
3	Evaluate seismic forces for various structures as per relevant Indian standards
4	Design and ductile detailing of structures for seismic resistance as per Indian standards
5	Apply the concepts of repair and rehabilitation of earthquake affected structures

Internal Marks-	**University**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (l5marks. for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3Hours**

Course Objectives	
1	To study principles of geology applicable for tunnel and underground openings.
2	To analyze the engineering behavior of rock in underground excavations.
3	To develop interpretation skills for underground projects.
4	Confident in problem solving related to engineering behavior of the subsurface.
5	Effective technical communication, Forecasting, Calculated risk taking.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Apply engineering geological concepts and approaches on rock engineering projects.
2	Explain soil profile, geo-hydrological characters of various rock formations and necessity of geological studies in water conservation.
3	Synthesize and Interpret the geologic data to establish the geological framework needed for design and construction of underground openings
4	Validate the suitability of rocks based on mechanical properties, R.Q.D. and geophysical exploration
5	Illustrate the suitability of proposed alignments for tunnels and bridges on the basis of Geological investigations.

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	**T/A**	**CO**
UNIT NO.1 Engineering Geology In Theory And Practice			
Engineering Geology In Theory And Practice: Influence of various minerals on the engineering behavior of rocks, role of structural geology, geomorphology and stratigraphy in deciding alignment of the tunnels.	**03**		**1**
Engineering Geological Interpretation of Laboratory and In-Situ Tests Rocks :Physical properties, Compressive strength, Tensile strength, Direct shear test, Triaxial shear test, Slake durability test, Schmidt rebound hardness test, Sound velocity test, In-Situ Tests: In situ stresses, Plate loading test, Goodman jack test, Plate jacking test, In-situ shear test, Field permeability test.	**03**		**1**
	06		
UNIT NO.2 Soil Profile of India			
Geological process of soil formations: rock weathering conditions favorable for decomposition, disintegration, effect of climate on formation of soil, soil profile of various states in India, residual and transported soils, various water conservation techniques.	**03**		**2**
Effect of over exploitation of tube wells, bore wells and dug wells, artificial recharge, rainwater harvesting, watershed development and necessity of geological studies, relevant case studies highlighting the success and failure of these techniques.	**03**		**2**
	06		

UNIT NO.3 Engineering Geological Investigation for Tunnels or underground openings			
Engineering Geological Investigation for Tunnels or underground openings: Stability of portal sections; evaluation of tunnel alignment.	**03**		**3**
Choice of method of tunneling depending on the geological framework. Problems in underground openings of coastal area.	**03**		**3**
	06		
UNIT NO.4 Geophysical Explorations and Rock Mechanics			
Geophysical explorations: various methods of geophysical explorations, evaluation and analysis of the data produced during these methods, application of these methods in civil engineering projects.	**03**		**4**
Rock mechanics: general principles of rock mechanics, dependence of physical and mechanical properties of rocks on geological characters, analyzing and evaluating of core recovery.	**03**		**4**
	06		
UNITNO.5 Engineering Geological Exploration			
Geological exploration for tunnels: variations in methodology of investigation for different types of tunnels for different purposes, location, spacing, angles and depths of drill holes suitable for different types of tunnels, difficulties introduced in various geological formation and their unfavorable field characters, stand up time of rock masses and limitations of it.	**03**		**5**
Dependence of protective measures such as guniting, rock bolting, shotcreting, steel fiber shotcreting, permanent steel supports, lagging concreting and grouting above permanent steel supports on geological conditions, illustrative case studies. Bridges: investigation for bridge foundation, special techniques, and objectives of investigation for bridge foundation, bridge foundation based on nature & structure of rock, foundation settlements.	**03**		**5**
	06

Course Objective	
1	The course will provide students' knowledge regarding the different sources of water & waste water, characteristics, available treatment technologies and designs
2	The course will make students able to design and implement the different water and wastewater treatment units
3	The course will provide students the knowledge regarding real problems finding and handling strategies of water and wastewater treatments.
4	The course will prepare students to learn recent and advanced treatments of water and wastewater and disposals methods.

Course Outcome	
After completion of syllabus student able to	
1	Understand the process and design components of water treatment such as Aeration, coagulation-flocculation and Sedimentation
2	Understand the process and design the components of water treatment such as Filtration, Disinfection
3	Understand the various sources characteristics and disposal methods of wastewater
4	Understand and design the different preliminary and primary waste-water treatment
5	Understand and design the different Secondary waste-water treatment

SYLLABUS

Unit No.1 Introduction to WTP & Aeration, Coagulation- flocculation & Sedimentation			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction to Water Treatment: Objective of water treatment, unit operation and unit processes, treatment flow sheet, site selection for water treatment plant	**01**		**1**
Aeration: objective of aeration, types or aerators,	**01**		
Design of cascade aerator, gas transfer, two film theory	**01**		
Coagulation- Flocculation: Theory of coagulation objectives, types & factors affecting coagulation and flocculation, nature and types of chemical coagulants used in water treatment, coagulant and flocculent aids	**01**		
Design of rapid and slow mixing devices (hydraulic and mechanical),	**01**		
Sedimentation: Theory of sedimentation, factors affecting, types of settling, analysis of discrete and flocculent settling,	**01**		
Design of sedimentation tank and clariflocculators	**01**		
	07		
Unit No.2 Filtration, Disinfection &Minor methods			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Filtration: mechanism of filtration, types of filters	**01**		**2**
Design of rapid sand filters, filter media specifications,	**01**		
Preparation of filter sand from stock sand, problems in filtration.	**01**		
Disinfection: Method of disinfection, kinetics of disinfection, types of disinfectants,	**01**		

chlorination, method of chlorination (breakpoint chlorination), factors affecting efficiency of chlorination	**01**		2
Iron and manganese removal, de-fluorination.	**01**		
Recent development in water treatment	**01**		
	07		

Unit No.3 Characteristics & Disposal of Waste water

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction to waste water Sources, Physical and chemical characteristics of waste water	**02**		**3**
DO, BOD, COD, determination of BOD rate constant, Problems on DO and BOD	**03**		
Disposal of sewage by dilution and by land disposal, Streater-Phelps's equation. Numerical	**02**

Sem: VII	**Total Hours Distribution per week**		
Total Credit: 3	**Lecture : 3 Hours**	**Tutorial//Activity (T/A): 0Hrs**	**Practical (P): 0Hrs**
Subject Code	**BTCVE704T**	**Subject:- Forensic In Civil Engineering (Elective-VI)**	

Examination Scheme			
Internal Marks-	**University**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(l5marks. for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hrs**

Course Objectives	
1	To impart knowledge of various testing methods of Failed Structures.
2	To learn about aspects of failures connected with various structural systems and materials.
3	To impart knowledge about foundation failures.
4	To know about strategic measures against failures
5	To gain insight into previous structural failures.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Understand various testing methods of Failed Structures.
2	Understand the aspects of failures connected with various structural systems and materials.
3	Plan the strategic measures against failures.
4	Can write the legal and technical report of the failure in lucid manner.
5	To impart knowledge about structural failures

Course Objective	
1	To Learn basic principles of irrigation management
2	To impart the knowledge of various irrigation efficient and effective methods
3	To know the efficient irrigation and water management to maximise crop yield
4	To discuss the importance of participation of irrigation stake holders
5	To know various rules and regulations, various water laws

Course Outcome	
After completion of syllabus student able to	
1	Discussion of various principles of irrigation management
2	Study of various methods of canal section design and approaches of optimal canal design
3	Estimation of seepage losses through a canal system and criteria to minimise it
4	Involvement of various stake holders of irrigation system and efficient functioning for the better efficiency of the system
5	Knowing various policies and attempt made by state and central Government for the proper functioning of irrigation system

30 Marks (15 Marks for sessional examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	The student can understand, analyze, apply and evaluate various parameters required in the design of flexible and rigid pavement of highway and airfield pavements.
2	They can analyze, apply and evaluate the analysis of flexible and rigid of highway and airfield pavements.
3	They can analyze, apply and evaluate the design of flexible and rigid of highway and airfield pavements.
4	They will be able to conduct field tests and can analyze, apply and evaluate the design strengthening of pavements.

Course Outcome	
After completion of syllabus student able to	
1	Analyze the stresses and strains in a flexible pavement using multi-layered elastic theory.
2	Design a flexible pavement using IRC, Asphalt Institute, and AASHTO methods.
3	Analyze stresses and strains in a rigid pavement using Westergaard's theory.
4	Design a rigid pavement using IRC, and AASHTO methods.
5	Comprehend the concept of strengthening of existing pavements and pavement management system

Sem: IV (4th)	**Total Hours Distribution per week**		
Total Credit: 3	**Lecture (L): 3Hrs**	**Tutorial/Activity (T/A): N.A**	**Practical (P): N.A**
Subject Code	**BTCVE401T**	**CONCRETE TECHNOLOGY**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15marks for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	To know different types of cement as per their properties for different field applications, properties of Aggregates and Admixture
2	To know tests on concrete in plastic and hardened stage as well as behaviour of concrete structure
3	To understand Design economic concrete mix proportion for different exposure conditions and Intended purpose.
4	To understand the knowledge of Special Concrete.
5	To understand the various repairing techniques and their material.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Think logically for development Concrete technology application in field of Civil Engineering
2	Gain an experience in the implementation of Concrete Materials on Engineering concepts which are applied on Construction Fields
3.	Understand the process of mix design of concrete.
4.	Differentiate special concrete from conventional concrete.
5.	Analyze causes of deterioration of concrete components

BTCVE401T- CONCRETE TECHNOLOGY

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1(BASICS AND CONSTITUENTS OF CONCRETE)			
Historical background, composition of concrete, general note on strength mechanism, recent practice and future trends	1		1
Constituent of Concrete : **Cement -** Chemical composition, hydration, heat of hydration, hydrated structure, various types of cement, grades of cement, testing of cement as per Indian standard.	2		1
Aggregates - Utility in concrete, classification, effect of geometry & texture, strength, mechanical properties, moisture content, water absorption, bulking of sand, deleterious substances, sieve analysis, various grading and grading requirements	2		1
Water - General Requirements & limiting values of impurities	1		1
Admixtures - Additives and admixtures, types, necessity and benefit Mineral admixture - Fly ash, silica fume, blast furnace slag, and other pozzolanic materials. Chemical admixtures - Accelerator, retarder, water reducing elements, plasticizer and super-plasticizer, their functions and dosage	2		1
	8		
UNIT NO.2(FRESH AND HARDENED CONCRETE)			
General: Methods of batching and mixing. Workability –factors affecting workability, measurement tests on workability(Slump cone test, Compaction factor test, Vee-bee consistometer test, flow table test), transporting and placing of concrete, curing of concrete, W/c ratio, Segregation and bleeding, Maturity of Concrete.	3		2
Compressive and tensile strength test, flexural strength and their relationship, factors affecting strength of concrete.	2		2
Introduction to aspects of elasticity, shrinkage and creep. Factors affecting shrinkage and creep, non-destructive tests with their limitations.	2		2
	7		

UNIT NO.3(MIX DESIGN)			
Principles of mix proportioning, probabilistic parameters, factors governing selection of mix.	**2**		**3**
Methods of Concrete Mix Design: Variability of test results, acceptance criteria, Road note 4 method(DOE), ACI and IS method of concrete mix design and fly ash based mix Design.	**5**		**3**
	7		
UNIT NO.4 (SPECIAL CONCRETE)			
Review of behaviour and characteristics of high strength concrete, high performance concrete, self-compacting Concrete, fibre reinforced concrete, light weight and heavy weight concrete,.	**4**		**4**
Pumped concrete, underwater concrete, hot and cold weather concreting, Ready mixed concrete.	**3**		**4**
	7		
UNIT NO.5 (REPAIR AND REHABILITATION OF CONCRETE STRUCTURE)			
Distress in structure – causes and precautions, damage assessment of structural elements, repairing techniques and repairing materials.	**3**		**5**
Cracks in concrete: Causes, types, prevention, repairs of cracks – materials and methods.	**4**		**5**
	7

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	To make students understand the determinate and indeterminate structures, their methods of analysis and construction of influence lines.
2	To make students understand the behaviour of beams and frames using Slope Deflection Method and Moment Distribution Method.
3	To make students understand the concept of Influence Line Diagram and analysis of the structural members subjected to Rolling Loads.
4	To make students understand the concept of formulation of Stiffness Matrix, Transformation Matrix, Load Matrix and its application to Beams and Plane Frames.
5	To make students understand the concept of formulation of Stiffness Matrix, Transformation Matrix, Load Matrix and its application to Plane Truss.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Apply knowledge to analyse determinate and indeterminate structures.
2	Apply knowledge to perform analysis of beams and frames using Slope Deflection Method and Moment Distribution Method.
3	Apply knowledge of Influence Line Diagram to analyse structural members for rolling loads.
4	Apply knowledge of Direct Stiffness Method to analyse Beams and Plane Frames.
5	Apply knowledge of Direct Stiffness Method to formulate Stiffness Matrix, Transformation Matrix, Load Matrix to analyse Plane Truss.

	L	T/A	
UNIT NO.1 (STATICALLY INDETERMINATE STRUCTURES)			
Introduction to Statically indeterminate Structures : Concept of Static indeterminacy.	2	1	**1**
Analysis of Fixed and Continuous Beams by Three Moments Theorem, effects of Sinking of Support.	6	1	
UNIT NO.2 (ANALYSIS OF BEAMS AND FRAMES)			
Analysis of Continuous Beams & Portal frames by Slope Deflection Method .	4	1	**2**
Analysis of Continuous Beams & Simple Portal frames (sway and Non Sway) Using Moment Distribution Method.	4	1	
UNIT NO.3 (INFLUENCE LINE DIAGRAM)			
Rolling loads on simply supported beams with concentrated and uniformly distributed loads, maximum B.M. and S.F. Influence Line Diagrams for Reactions, Shear Forces and Bending Moments in simply supported beam, cantilevers and beams with overhangs, ILD for forces in members of Simple Trusses.	6	1	**3**
UNIT NO.4(MATRIX STIFFNESS METHOD –APPLICATION TO BEAMS AND PLANE FRAMES)			
Basic concept, Degree of Freedom, Direct Stiffness Method. Formulation of elemental/local stiffness matrix and global stiffness matrix for beam members (without axial deformation), for plane frame members. Member load matrix due to concentrated loads, uniformly distributed loads. Transformation matrix, Assembly of global/ structural load matrix upto three elements. Solution to problems with maximum degree of freedom three.	7	1	**4**
UNIT NO.5 (STIFFNESS METHOD – APPLICATION TO PLANE TRUSS)			
Formulation of elemental/local stiffness matrix and global stiffness matrix for plane truss. Transformation matrix, Assembly of global/ Structural stiffness matrix upto (8 x 8). Assembly of global / structural load matrix. Solution to problems with maximum degree of freedom three.	7	1	**5**

Sem: IV (4th)	**Total Hours Distribution per week**		
Total Credit : 3	**Lecture (L): 3 Hrs**	**Tutorial/Activity (T/A): NA**	
Subject Code	**BTCVE403T**	**ENVIRONMENTAL ENGINEERING**	
Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	The course will provide students knowledge regarding the sources of water, water demands, population forecasting, characteristics, standards of drinking water
2	To prepare students to analyze, plan and design of various phases of water supply systems and waste water treatment.
3	To provide the students the knowledge regarding the various characteristics of water, waste water estimation of the quantity of water
4	The course will provide students with fundamentals of air pollution and solid waste management, climate change, geo environment and sustainable resource management

Course Outcomes	
After completion of syllabus, students would be able to	
1	Have knowledge of characteristics of water,drinking water standards and necessity of treatment.
2	Design various units of conventional water treatment plant.
3	Understand the characteristics of waste water, necessity of treatment, types of treatment processes
4	Equip with the basic knowledge related to design of waste water treatment
5	Understand of significance of air pollution, solid waste , climate change, geo environment etc

BTCVE403T – ENVIRONMENTAL ENGINEERING

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1			
Introduction: Basics of water supply scheme, Water Demand, population forecasting methods, Sources of water & intake structures.	2		1
Conveyance of water: Types of pipes, joints, fittings, valves & appurtenances.	2		
Water quality: characteristics of water, Standards of drinking water. (WHO 2011, CPHEOO, IS 10500-2016).	2		
Water Treatment: Objective of water treatment, flow sheet of conventional water treatment plant.	1		
Sedimentation: Principles, types of setting basins, inlet and outlet arrangements, simple design of sedimentation tank.	2		
UNIT NO.2			
Coagulation and Flocculation: Definition, Principles, types of coagulants, coagulant doses, types of mixing and flocculation devices, Clariflocculators.	3		2
Filtration: Mechanism of filtration Types of filters-RSF, SSF, Pressure filters, sand specification, operational problems.Simple design of SSF and RSF, Membrane filtration technique of water treatment.	3		
Disinfection: Purpose, Mechanism, disinfectants, disinfection by chlorination. Type of chlorination.	2		
Distribution systems: Requirements & methods of distribution systems with layouts	1		

UNIT NO.3			
General Introduction: Study of waste water, black water & grey water. System of collection and conveyance of sewage- separate and combined systems, patterns of sewage collection systems. Quantity of storm water and sanitary waste water, Problems on quantity estimation.	**3**		**3**
Sewer: Types, Shapes, Hydraulic Design (Capacity, Size, Grade, etc.), Construction of sewer - Shoring, Trenching and laying to grade. Sewer materials, Sewer Appurtenances - manhole street inlets, storm water overflows, inverted syphons, flushing and ventilation: House plumbing systems, sanitary fitting and appliances, traps, anti-syphonage, inspection chambers and intercepting traps. Sewage pumping - location of pumping station. Sewer testing and maintenance.	**3**		
Characteristics: Physical and chemical characteristics of wastewater, significance of BOD, COD, BOD rate constant (Problems)	**2**		
UNIT NO.4			
Preliminary & Primary Treatments: Sewage treatment flow sheet, site selection for sewage treatment plant. Preliminary and primary treatments - Screens, Grit chambers, oil & grease removal, Primary settling tank (Only working principles)	**3**		**4**
Secondary treatments - Principle of Biological Treatment, bacterial growth curve, Activated sludge process, trickling filter, sequence batch reactors, oxidation ponds (Only working principles)	**2**		
Sewage Disposals: Indian Standard for disposal, Methods of disposal, Sewage farming, self-purification of stream (Streeter Phelp's equation, Oxygen sag curve). Recycle & reuse of sewage (Zero discharge concept). Sludge digestion process, sludge drying beds.	**2**		
Rural sanitation: Pit privy, aqua privy, bio-gas recovery, Septic tank- soak pit (Only working principles). Sullage collection and disposal	**2**		
UNIT NO.5			
Introduction of air pollution and municipal solid waste, climate change, geo environment, environmental management system and sustainable resource management.	**3**		**5**

Course Objectives	
1	The course will provide students knowledge regarding transpiration technologies, administrative set-up in India, development plans and vision 2025.
2	To prepare students to design the cross section elements and the pavement using latest IRC Codes.
3	To provide the students the knowledge regarding the traffic characteristics, road safety audit and introduction to ITS.
4	The course will provide students with fundamentals of Railway Engineering and Airport Engineering.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Define and describe different objectives and requirements of Highway Development and Planning, Alignments.
2	Explain, Discriminate and Design various Geometric Features of Highways & Pavement Design
3	Understand, analyze, apply and evaluate the parameters of Traffic Engineering.
4	Explain and describe various terms in railway engineering and should be able to explain, discriminate and design various geometric features of railway track.
5	Understand the aircraft characteristics and terminal area functions, analyze, and evaluate the basic runway length, orientation of runway.

BTCVE404T – TRANSPORTATION ENGINEERING

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1			
Introduction Transportation Technologies, Components of Transportation Systems, Transportation Coordination, Transportation Administrative Set-up in India.	2		1
Highway development: Rural Road Development Plan and Vision 2025, Highway Organizations (MoRTH, IRC, CRRI, NHAI, NRRDA, CIRT)	3		
Highway Alignment: Ideal Alignment, Factors controlling alignment, Fact finding survey, Engineering survey for highway location.	3		
UNIT NO.2			
Highway Geometric Design: Cross-Section elements (Boundary lines, right-of way, carriageway width, Shoulder, Camber), surface characteristics, Sight distance Considerations (SSD, OSD,ISD), Design of horizontal Curves including transition, extra widening, Design of vertical curves.	5		2
Pavement Design: Types of Pavements and their comparison, Factors affecting design, Design of Flexible pavement using latest IRC code. Stresses in rigid pavement, joints, Pavement Distresses and remedies	3		
UNIT NO.3			
Traffic Engineering: Traffic characteristics (Road User and Vehicular), Traffic Studies (Speed Volume, O&D, Parking), Traffic Control Devices (Sign, Marking, Signal), Types of Intersections, Parking facilities, Road safety situation in India, Causes of road accidents, Safety of Vulnerable Road users, Introduction to road safety audit Introduction to ITS.	8		3

UNIT NO.4			
Railway Engineering: Permanent Way, ideal permanent way, Gauges in railway tracks,function of rial, sleeper ballast. Traction and resistances. Cant , negative cant & cant deficiency, Types of turnouts & functions of its components	**8**		**4**
UNIT NO.5			
Airport Engineering: Aircraft Characteristics, Airport site selection, Runway Orientation, Basic Runway length and corrections, Terminal Area and facilities. Aircraft parking, configuration and system, Aprons, Hangers, Gate in airport[8]	**8**		**5**

Course Outcomes:

On successful completion of the course students will be able to;

1. Determine the various properties of aggregates
2. Determine the various properties of bitumen
3. Determine the various properties of soil subgrade

List of Experiments: (Part A, B, C and D)

A. Test on Soil

1. CBR Test
2. AASHO Classification
3. Test on Stabilized soil

B. Test on Aggregate

1. Specific Gravity & Water Absorption
2. Crushing Value test on Aggregate
3. Abrasion Value test on Aggregate
4. Impact Value test on Aggregate

C. Test on Bitumen

1. Penetration Test
2. Softening Point Test
3. Ductility Test
4. Specific gravity of bitumen

D. Study experiments

1. Bituminous Mix Design
2. Road Construction Machineries
3. Road Safety Audit

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks 15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objectives	
1	To make the students aware of various surveying instruments, operating principles and theirsuitability
2	To develop skills of handling instruments, taking measurements and Performcalculations based on theobservation
3	Identification of source of errors and rectifythem.
4	To prepare the students to plot and also read the variousmaps.
5	To make the students aware of various surveying instruments, operating principles and theirsuitability

Course Outcomes	
After completion of syllabus, students would be able to	
1	Measure length and bearing of lines using various instruments and calculate area of given field.
2	Use the theodolite to measure angle and distances for traversing also identify and correct the errors in traverse. Design and lay-out the various types of curves.
3	To carry out levelling and contouring also able to determine volume of earthwork.
4	Use modern instrument like Total work station , GPS, DGPS for surveying and able to prepare maps in CAD
5	Use Remote Sensing and Geographical Information System(GIS), UAV Drone and LiDAR Survey.

BTCVE405T- SURVEYING AND GEOMATICS

SYLLABUS

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
UNIT NO.1 (LINEAR AND ANGULAR MEASUREMENT)			
Principal of Surveying, Classification,	01		01
measurement of distance using tape, EDM (Distomat), error and correction in length	02		01
Measurement of area by tape and cross-staff and plane table surveying	02		01
Compass Surveying-Prismatic Compass & Surveyor compass, Bearings, Localattraction, Fieldwork & Plotting	03		01
UNIT NO.2 (THEODOLITE TRAVERSING AND CURVES)			
Uses of theodolite, measurement of horizontal and vertical angle.	2		2
measurement of horizontal and vertical distances(stadia methods)	2		2
errors and corrections in traverse	2		2
Introduction to simple circular curves, Transition curves, vertical curves and Reverse Curve	2		2
UNIT NO.3 (LEVELING AND CONTOURING)			
Levelling , types of levelling, Auto level, temporary adjustments,	1		3
calculation of Reduced level by rise and fall & H.I. method	2		3
correction for curvature and refraction , visible horizon distance,	1		3
Contours: Definition, characteristics, uses, locating and plotting of contour map.	2		3
Computation of area and volume: Trapezoidal and Simpsons Rule	2		3

UNIT NO.4(MODERN SURVEYING)			
Total station-advantages and Applications.	**1**		**4**
Field Procedure for total station survey,	**1**		**4**
Errors in Total Station Survey and preparation of Contours and site plan in CAD	**2**		**4**
Introduction to GPS and DGPS (Differential Global Positioning System) Principle and Applications for Static and Real Time Kinematic (RTK)Survey	**4**		**4**
UNIT NO.5 (REMOTE SENSING AND GIS)			
Introduction to Remote Sensing and Geographical Information System (GIS) and itsapplications	**4**		**5**
Introduction to UAV Drone and LiDARSurvey and applications.	**4**		**5**

B. TECH. CIVIL ENGINEERING

(CHOICE-BASED CREDIT SYSTEM)

BTCVE4O6P- MINI PROJECT

SYLLABUS

Project allotment and identification should be done at the end of 3rd semester. Following guidelines may be used for the mini-project allotment and evaluation.

Guidelines:

The knowledge and concepts related to Engineering acquired by the students in four years of the course has to be implemented in the form of some practical work. Hence in the second year of the course, every student has to do a mini project work by applying the acquired concepts and knowledge. Therefore at the entry of fourth semester, the student initiates mini-project work with a defined group. Industry-oriented project should be preferred.

1. The institute will care the research and topic interest of each student and it offers flexibility to the student for formation of groups according to their choice of particular interest. However it is advised them to follow limitation of group members (four to five students per group). The list of guides along with their specialization should be provided at the end of third semester. Every teacher can be guide and co-guide. Institute can take Industry person /Government Organization member such as PWD, irrigation department's person as a Co -guide.
2. The group of students will approach to the guide for the consent and submit the application to the project coordinator of the department at the end of third semester.

OR

The group of students will submit the application to the department at the end of third semester with preferences of guides as per their specialization and previous semester's university scored marks.

3. Project Coordinator should prepare the merit list of the project groups as per the policy of the Institute.
4. In the due course of time, students will carry out a literature review about their area of interest and identify the scope of work by deciding the topic in consultation with the guide. The mini projects should be industry oriented; application, product, research, review , etc. title of mini project should be basis on the feasibility study of the project.
5. The project may have analytical approach in respective discipline area or

interdisciplinary domain.

6. Progress seminars are conducted wherein the students will present their progress of the work before the project review committee. The committee will evaluate their work with respect to the following rubrics:

A. Understanding the background and topic/Content of the progress report or seminar
B. Knowledge about existing system/Literature Review
C. Technical design and findings of the system/technical content
D. Presentation skills
E. Viva voce (IndividuaUgroup)

7. Contents of Presentation/reports at the time of external examinations (may be used for Internal Examinations also) will as below:

A. Index
B. Introduction
C. Literature review
D. Objective
E. Working model/analysis/design details
F. Conclusion
G. References

The parameters mentioned above are for general guidelines; however, they may vary from department to department. The departments should ensure that the evaluation is done at individual and group levels.

B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VI	**Total Hours Distribution per week**		
Total Credit: 04	**Lecture (L): 3 Hrs.**	**Tutorial/Activity (T/A): 1 Hrs.**	**Practical (P): 2 Hrs.**
Subject Code	**BTCVE601T**	**Name of Subject: Estimating and Costing**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**4 Hours**

Course Objective	
1	To differentiate the types of Estimation, adopt specification and Unit Rates.
2	To analyse rates for different items of works.
3	To interpret the drawings and estimate the Quantities of various items in civil engineering structures.
4	To understand departmental procedures and Take measurement of completed work On successful completion of this course.
5	To understand different techniques of preliminary & detailed estimation of buildings & roads.

Course Outcome	
After completion of syllabus student able to	
1	Prepare the preliminary estimate for administrative approval & technical sanction for a civil engineering project.
2	Write the specification of the works to be undertaken, prepare the tender documents, fill the contracts and make use of knowledge of different contract submission & opening in awarding the work to the contractor.
3.	Use the concept of SD, EMD, MAS, Running Bill, Final Bill during the entire project
4.	Use the technique of Rate analysis in estimating the exact cost of material & manpower and hence the entire project.
5.	Estimate the bill of quantities using different techniques of preliminary & detailed estimation of buildings & roads & Arrive the exact value of the asset (movable & immovable) using different Valuation techniques

SYLLABUS

Unit No.1 Introduction			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction: Importance and purpose of the subject, Units of measurement as per I.S.1200. Items of work and Description of items of work,,	**01**		**1**
Administrative approvals, technical sanction, preliminary estimates. objectives, and its methods	**02**		**1**
Study of Earthwork estimates in road, hill roads and canals, methods of consumptions of earthwork.	**01**		
Detailed estimates, objects, importance, accuracy. Methods of detailed estimates, Detailed estimates of load bearing and framed structures.	**04**		
	08		
Unit No.2 Calculation of steel , Tender and contracts			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Calculation of reinforcing steel with Bar bending Schedule.	**03**		
Tenders and Contracts: Method of carrying out works, tender notice, acceptance of tender, essentials of contract, type of contracts, contract documents, land acquisition act, Legal aspects of various contract provisions, Arbitration.	**03**		**2**
Public work department procedure of work: Organisation of Engineering department, Methods of carrying out works, stores, stucks, Tools and plants, Mode of payment, Public work account, Power of sanctions	**01**		**2**
	07		

Unit No.3 Specifications:			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Specifications: IS 1200 Introduction, Purpose and principles of specifications writing, Types of specifications, writing and developing	**02**		
Detailed specifications of Important items of building and road work.	**03**		
Classification of cost, direct and indirect charges, distribution of overheads, M.A.S Account, issue rates and stores account.	**02**		**3**
	07		
Unit No.4 Rate Analysis			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction, Purpose and principles of CSR, Factors affecting analysis of rates, labour guidelines from National Building Organization, Task work.	**04**		**4**
Market rates of materials and labour, Rate analysis of major items of work	**03**		**4**
	07		
Unit No.5 Valuation			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Purpose of valuation, Factors affecting property price and cost, Types of Value.	**03**		**5**
Real Estate, Tenure of land, Free hold and lease hold, sinking fund, Depreciation, and its methods, Capitalised value, Methods of valuation, Net & Gross income, Rent fixation.	**04**		**5**

ESTIMATING AND COSTING

BTCVE601P **Evaluation Scheme: (25-Internal/25-External)**

(P-2 Hrs/Week); Total Credits-01

PRACTICAL – Minimum 8 practical assignments based on

1. Preliminary estimate using Plinth area method.
2. Detailed estimate of Load bearing structure
3. Detailed estimate of Frame structure.
4. Calculation of steel with Bar bending Schedule.
5. Detailed estimate of earthwork of road for Approximate 1km length.
6. Draft Detailed specification for 8 major items.
7. Collection of four different types of Tender
8. Calculation of annual and total Depreciation and book value of the end of each year.
9. Fixation of standard rent of property.
10. Analysis the unit rate of 8 major items of work contained.
11. Market survey for material and labour rates for various items.
12. Detailed planning and estimate of plumbing work.

Note: Collection of different bank rates of nearby location, Comparative study of different units eg- Brass, foot, meter, cm, cum etc is compulsory.

Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To describe occurrence, movement and distribution of water and to estimate water abstractions, runoff and hydrographs
2	To study the concepts of irrigation and different systems and methods of irrigation and to estimate the quantity of water required by crops.
3	To determine storage capacity of reservoir and to analyse and design earth dams
4	To analyse and design gravity dams and to study types of spillways and energy dissipators
5	To design unlined and lined channels and study the concept of other irrigation structures

Course Outcome	
After completion of syllabus student able to	
1	Understand occurrence, movement and distribution of water and estimate water abstractions, runoff and hydrographs
2	Illustrate different systems and methods of irrigation and estimate the quantity of water required by crops and estimate the quantity of water required by crops.
3	Estimate reservoir capacity and analyse and design earth dams
4	Design and analyse gravity dams and illustrate types of Spillways and energy dissipators
5	Design unlined and lined channels and illustrate concepts of other irrigation structures

SYLLABUS

Unit No.1 Hydrology

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Hydrologic cycle, Water availability in India, Water balances, National Water Policy	**01**		**1**
Precipitation: Types, Measurement, Data analysis and presentation, Probable Maximum Precipitation	**02**		**1**
Evaporation and its measurement, Evapotranspiration and its measurement, Penman Monteith method, Infiltration: Horton's equation and Green Ampt method.	**02**		**1**
Concept of basin as a unit for development, Runoff: drainage basin characteristics, Estimation of runoff, Streamflow measurement	**02**		**1**
Concepts of unit hydrograph, S-curve hydrograph, Synthetic hydrograph, Stage discharge curve	**02**		**1**
	09		

Unit No.2 Water application and Irrigation methods

Details of Topic:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Systems of Irrigation: Lift irrigation, Tank irrigation, Well irrigation,	**02**		**2**

Irrigation methods: Surface and Sub-Surface Irrigation, Sprinkler and Drip Irrigation	**02**		**2**
Duty, Delta and Base period, Computation of duty and frequency of Irrigation	**02**		**2**
Soil Moisture and Consumptive use, Irrigation water quality, Crop rotation and Irrigation assessment	**02**		**2**
	08		
Unit No.3 Reservoir and Earthen dam			
Details of Topic:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Reservoir: Types, Investigations, Site selection, Zones of storage,	**01**		**3**
Safe yield, Reservoir storage capacity, Reservoir sedimentation and control.	**02**		**3**
Dams: Types of dams, Earth and rockfill dams, typical sections of earth and rockfill dams	**02**		**3**
Analysis and design of earthen embankments, seepage control in earth dams	**03**		**3**
	08		
Unit No.4 Gravity Dams and spillways			
Details of Topic:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Gravity dams, overflow and non-overflow sections, Forces acting on Gravity dams	**02**		**4**
analysis and design of gravity dams, Foundation treatment in concrete dams, joints, water seals, galleries in concrete dams	**03**		**4**
Types of spillways, design of Ogee spillway,	**01**		**4**
Types of gates in spillways and types of energy dissipation below spillways	**01**		**4**
	07		

Unit No.5 (Canals and hydraulic structures)			
Details of Topic:	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Alignment of canals, canal capacity, losses, FSL of canal, Kennedy's silt theory, Lacey's regime theory, use of Garrets diagrams and Lacey's Regime diagrams	**03**		**5**
Lining of irrigation channels, design of lined canal, balancing depth, Cross section of an Irrigation channel	**02**		**5**
Water logging: Causes, surface and sub-surface drains	**01**		**5**
Introduction: hydraulic structures, storage, diversion, conveyance and distribution structures	**01**		**5**
	07

Subject Code	**BTCVE604T**	**Name of Subject: Prestressed Concrete (Elective-III)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To familiarize the students with concept of pre-stressed concrete.
2	To impart knowledge to design pre-stressed concrete structures.

Course Outcome	
After completion of syllabus student able to	
1	Understand the behaviour of pre-stressed concrete.
2	Design of the pre-stressed concrete structures.
3	Understand the knowledge of basic theories and fundamental behaviour of prestress concrete.
4	Perform the analysis and design of pre-stress elements.
5	Apply the fundamental knowledge to the solution of practical problems.

SYLLABUS

	Allotment of Hours		**Mapped with CO Number**
	L	**T/A**	**CO**
Unit No.1			
Partial pre-stressing, Analysis and design of End Blocks as per IS 1343 Method. (Only comparative study with the other methods is expected) Use of un-tensioned reinforcement. Types of pre-stressed concrete structures - Type – I, II, and III. Effect of Post-tensioning on axial Compression and tension members	**09**		**1**
	09		
Unit No.2			
Design of pre-stressed concrete Rectangular beam and one way slab by Limit state method, cable profile, Limiting zone of cable profile. Deflection of pre-stressed concrete beams (short-term, and long term) Shear and Torsional resistance of the pre-stressed concrete members, principal tension. Behavior of unbounded and bonded pre-stressed concrete beams	**09**		**2**
	09		

Unit No.3			
Composite construction of pre-stressed concrete structures and in-situ concrete, Differential shrinkage, deflection, flexural strength, serviceability (Limit state) of the composite sections. Introduction to application of pre-stressing to continuous beams, primary and secondary moment, Linear transformation and concordant cables	**09**		**3**
	09		
Unit No.4			
Flexibility Influence coefficient, Analysis of single-storey, single-bay fixed portal frame. Analysis and design of circular water tank, fixed, hinged, use of (IS-3370-2021)	**05**		**4**
	05		
Unit No.5			
Design of pre-stressed concrete poles, Special problems in pre-stressed concrete structures like corrosion, fatigue, dynamic behavior of pre-stressed concrete beams, behavior of pre-stressed concrete structures under fire.	**04**		**5**
	04		

RECOMMENDED BOOKS:

1 Pre-stressed Concrete by Dr, N. Krishna Raju

2 Pre-stressed Concrete by Dr. TY Lin

3 Pre-stressed Concrete by N. Rajgopalan, Narosa Publishing House, Mumbai, Ed. II- 2007.

4 Pre-stressed Concrete Design & Construction- Leonhardt F. Ernst Wilhelm and Sohen, Publ

B.TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VIth	**Total Hours Distribution per week**		
Total Credit: - 03	**Lecture : 03 Hours**	**Tutorial//Activity: 0 Hrs**	**Practical(P): 0 Hrs**
Subject Code	**BTCVE604T**	**Subject: - Soil Dynamics (Elective-III)**	
Examination Scheme			
Internal Marks-	**University Marks**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (l5 Marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3Hours**

Course Objectives	
1	To enchance students knowledge in dynamic loading
2	To enchance students knowledge in theory of vibrations.
3	To know the dynamic soil Properties, to train the students in machine foundation design.
4	To know the occurrence of liquefaction and the analyzing it.
5	Learn procedure of analysis & Design of different types of Machine foundation.

Course Outcomes	
After completion of syllabus, students would be able to	
1	Understand basics of soil dynamics, theory of vibration, propagation of body waves and surface waves through soil.
2	Understand different laboratory and field tests to determine dynamic soil properties required for design purpose
3	Understand liquefaction mechanism and evaluation of liquefaction potential studies by various tests
4	Understand the general requirements of machine foundation, and criteria for its design.
5	Understand analysis & design of different types of Machine foundation required in the field

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	**T/A**	**CO**
UNIT NO.1 Introduction to Dynamic loading			
Earthquake loading, machine vibrations, blast loading, background and lessons leant from damages in past earthquakes due to soil and ground failure,	**04**		**1**
Effect of soil properties on seismic response of structures, seismic waves and their characteristics.	**03**		**1**
	07		
UNIT NO.2 Soil Dynamics and its applications			
Fundamentals of vibrations: single, two and multiple degree of freedom systems, vibration isolation, vibration absorbers, vibration measuring instruments.	**03**		**2**
Wave propagation: elastic continuum medium, semi-infinite elastic continuum medium, soil behaviour under dynamic loading.	**04**		**2**
	07		
UNIT NO.3 Dynamic elastic constant of soil			
Stress-strain behaviour of cyclically loaded soils, effect of strain level on the dynamic soil properties, measurement of seismic response of soil at low and high strain, using laboratory tests	**03**		**3**
Cyclic triaxial, cyclic direct simple shear, resonant column, shaking table, centrifuge and using field tests - block vibration test, cross bore hole, their suitability and limitations, Interpretation of results, IS Codes	**04**		**3**
	07		
UNIT NO.4 Liquefaction of soils			
Liquefaction mechanism, factors affecting liquefaction, liquefaction of cohesionless soils and sensitive clays, liquefaction susceptibility,	**4**		**4**
Evaluation of liquefaction potential studies by dynamic tri-axial	**3**		**4**

testing, oscillatory shear box, shake table and blast tests.			
	07		
UNITNO.5 Machine Foundation			
Introduction: Types of machines, Types of machine foundations, Modes of vibrations, General requirements of machine foundation, General criteria for design, permissible amplitude	**02**		**5**
Analysis & Design of Machine foundation: Elastic homogeneous half space and lumped parameter solutions, analysis and design of foundations for reciprocating and impact type machines, turbines, effect of machine foundation on adjoining structures.	**03**		**5**
vibration isolation& control: Force isolation & motion isolation, Methods of isolation in machine foundations Isolating materials and their properties Bearing capacity of foundations: Introduction to bearing capacity of dynamically loaded foundations	**03**		**5**
	08

B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VI	**Total Hours Distribution per week**		
Total Credit: 03	**Lecture (L): 03 Hrs**	**Tutorial/Activity (T/A): 00Hrs.**	**Practical (P): 00Hrs.**
Subject Code	**BTCVE604T**	**Name of Subject: Environment Management (Elective-III)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Maximum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

List of Course Objective	
1	To develop, implement, monitor and maintain environmental strategies, policies, programmes and systems that promote sustainable development.
2	To identify and understand the major environmental management systems responsible for carrying out any sustainable development.
3	To oversee the environmental performance including compliance with environmental legislation across the organization.
4	To lead the implementation of environmental policies and practices and raise awareness, at all levels of an organization, about the emerging environmental issues.
5	To coordinate all aspects of pollution control, waste management, environmental health and conservation.

List of Course Outcome	
After completion of syllabus student should be able to	
1	Identify the scientific and social aspects of environmental issues.
2	Understand the procedure of environmental impact assessment.
3	Identify and evaluate and the environmental risk assessment involved in the EMP.
4	Understand the importance of the process of Environmental Audit and vital parameters associated with it.
5	Understand the role of environmental management system in protecting the resources using environmental legislations.

SYLLABUS

Unit No.1 (Introduction)			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction to Environmental Management: Objectives, Standards of living	**2**		**1**
Goals and components of Environmental Management, Socio-economic context.	**2**		**1**
Environmental Sustainability and sustainable development, issues and constraints	**2**		**1**
Environmental values and ethics	**1**		**1**
	7		
Unit No.2 (Environmental Impact Assessment)			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Environmental Impact Assessment (EIA) – Definition, History and Objective	**1**		**2**
Role, Benefits and flaws of EIA in India,	**1**		**2**
EIA Procedures	**1**		**2**
Key elements of EIA: Screening, scoping identifying and evaluating impacts	**2**		**2**
Mitigations and issuing environmental statements.	**1**		**2**
Environmental Impact Statement	**1**		**2**
	7		
Unit No.3 (Environmental Risk Analysis)			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Environmental Risk Analysis: Fundamentals of hazards, exposure & risk assessment management.	**2**		**3**
Basic Steps in risk management- hazard identification, exposure assessment & risk characterization.	**2**		**3**
Stages in the prior Environmental Clearance (EC), Process for New Projects: Screening, scoping, public consultation	**3**		**3**

Critical environmental issues and formulation of strategies of Environmental Management Plan (EMP)	**2**		**CO3**
	9		

Unit No.4(Environmental Audit)

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Environmental Audit (EA)- Concept of EA, procedural aspects of conducting environmental audit,	**2**		**4**
Environmental Management System (EMS), Life Cycle Assessment and Management (LCA),	**2**		**4**
ISO environmental standards: Introduction to ISO 1400 series, International voluntary standards	**1**		**4**
Eco marks and eco labelling: Assuring the quality.	**1**		**4**
Post Project Monitoring	**1**		**4**
	7		

Unit No.5 (Environmental legislation)

Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Environmental Policy, Law And Appraisals –various enactment and their provisions	**2**		**5**
Role of State & Central boards of pollution control	**1**		**5**
Cleaner Technology of production	**1**		**5**
Energy Impact Analysis: Energy sources, Importance of energy impact analysis	**2**		**5**
Resource Management: Mineral, Energy, Water, Renewable, Food, Land and its depletion– causes & effects, Optimization of resource utilization.	**2**		**5**
	8

Sem: VI	**Total Hours Distribution per week**		
Total Credit: 3	**Lecture (L): 3Hrs**	**Tutorial/Activity (T/A): 1 Hrs.**	**Practical (P):**
Subject Code	**BTCVE604T**	**Name of Subject: Repairs & Rehabilitation of Civil Engineering Structures (Elective- III)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks (15marks for sessional Examination) (15 Marks for Activity based)	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	Familiarize Students with deterioration of concrete in structures
2	Equip student with concepts of NDT and evaluation
3	Understand failures and causes for failures in structures
4	Familiarize different materials and techniques for repairs
5	Understand procedure to carryout Physical evaluation of buildingsand prepare report

Course Outcome	
After completion of syllabus student able to	
1	Explain deterioration of concrete in structures
2	Carryout analysis using NDT and evaluate structures
3.	Assess failures and causes of failures in structures
4.	Carryout Physical evaluation and submit report on condition of the structure
5.	Carryout analysis of structures and take preventive action as per conditions & Requirement

1 Low 2 Medium 3 High

SYLLABUS

Unit No.1 Deterioration of concrete in structures			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Physical processes of deterioration like Freezing and Thawing, Wetting and Drying,	**02**		**1**
Abrasion, Erosion, Pitting, Chemical processes like Carbonation, Chloride ingress, Corrosion,	**02**		**1**
Alkali aggregate reaction, Sulphate attack Acid attack, temperature and their causes,Mechanism, Effect, preventive measures. -	**02**		**1**
Cracks: Cracks in concrete, type, pattern, quantification, measurement & preventive measures.	**02**		**1**
	08		

Unit No.2 Non Destructive Testing			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Nondestructive test methods for concrete including Rebound hammer, Ultrasonic pulse velocity,	**03**		**2**
Rebar locator, Corrosion meter, Penetration resistance and Pull out test, Core cutting-	**02**		**2**
Corrosion: Methods for corrosion measurement and assessment including half-cell potential and resistivity, Mapping of data.	**02**		**2**
	07		

Unit No.3 Failure of buildings			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Definition of building failure-types of failures- Causes of Failures- Faulty Design,	**02**		**3**
Accidental over Loading, Poor quality of material and Poor Construction practices-	**02**		**3**
Fire damage - Methodology for investigation of failures-diagnostic testing methods and equipments-repair of cracks in concrete	**03**		**3**
	07		
Unit No.4 Materials for repair and rehabilitation			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Admixtures- types of admixtures- purposes of using admixtures- chemical composition- Natural admixtures- Fibres- wraps- Glass and Carbon fibre wraps- Steel Plates- Concrete behavior under corrosion, disintegrated mechanisms- moisture effects and thermal effects –	**04**		**4**
Visual investigation- Acoustical emission methods- Corrosion activity measurement- chloride content – Depth of carbonation- Impact echo methods- Ultrasound pulse velocity methods- Pull out tests.	**03**		**3**
	07		
Unit No.5 Investigation of structures &Repair Techniques			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Distress, observation and preliminary test methods. Case studies: related to rehabilitation of bridge piers, dams, canals, heritage structures, corrosion and erosion damaged structures.	**03**		**3**
Grouting, Jacketing, Shotcreting, externally bonded plates, Nailing, Underpinning and under water repair; Materials, Equipments, Precautions and Processes.	**04**		**5**
	07

Sem: VI	**Total Hours Distribution per week**		
Total Credit: 03	**Lecture (L): 3 Hrs**	**Tutorial/Activity (T/A): 0 Hrs.**	**Practical (P): 0 Hrs.**
Subject Code	**BTCVE604T**	**Name of Subject: Water Transmission and Distribution Systems (Elective-III)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15marks for sessional Examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To learn the concept of computation of optimal diameter of rising main based on the various cost elements involved in it
2	To estimate the storage capacity of a distribution reservoir and to discuss various components of distribution reservoir
3	To discuss various methods of analysis of a water distribution network
4	To study various criteria of planning of an optimal water distribution network
5	To know the methods of the optimal design of water distribution network and their suitability

Course Outcome	
After completion of syllabus student able to	
1	Understanding the various head loss formula used for water distribution design and also know the methodology of optimal diameter of pumping main
2	Estimation of storage capacity of a distribution reservoir and also to understand the utility of various appurtenance used in WDN
3	Understand the concepts of various methods of analysis of WDN
4	Understanding various techniques of the optimal planning of water distribution network
5	Implementation of various methods of optimal water distribution network design

SYLLABUS

Unit No.1			
	Allotment of Hours		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction- General principle used in pipe line design, various components of water transmission and distribution systems, Head loss formula, minor losses, equivalent pipe concept	**04**		**1**
Rising main- Basic requirements, Types, diameter computation by considering various cost elements. Optimal diameter of rising main	**04**		**1**
	08		
Unit No.2			
	Allotment of Hours		**Mapped with CO Number**
	L	**T/A**	**CO**
Distribution reservoirs- impounding and service reservoirs, necessity, various storages, location and height, various component parts, capacity computation.	**03**		**2**
Design principle of water distribution system- Planning, design and analysis of WDN, component parts	**01**		**2**
Pipe appurtenances- Various valves and fittings, pumps, pressure release valve and check valves	**03**		**2**
	07		
Unit No.3			
	Allotment of Hours		**Mapped with CO Number**
	L	**T/A**	**CO**
Analysis of water distribution network- Parameter inter relationship,	**08**		**3**

formulation of equations, types of problem, Hardy cross method, Newton Raphson method, Linear theory method, Electrical analogy method, Multi reservoir system analysis			
	08		

Unit No.4

	Allotment of Hours		**Mapped with CO Number**
	L	**T/A**	**CO**
Node Flow analysis- Node Head Analysis (NHA) and Node Flow Analysis (NFA), Node classification, Node flow compatibility, NFA of serial network	**04**		**4**
Planning of an optimal network-Branching of network, selection of branches computation of first trial HGL values	**04**		**4**
	08		

Unit No.5

	Allotment of Hours		**Mapped with CO Number**
	L	**T/A**	**CO**
Design of optimal WDN- Various approaches, cost head loss ratio criterion, Linear Programming technique, introduction to non linear programming	**8**		**5**
	08

Total Credit: 3	**Lecture (L): 3Hrs**	**Tutorial/Activity (T/A): 0hrs.**	**Practical (P): 0 Hrs.**
Subject Code	**BTCVE604T**	**Name of Subject: Urban Transportation Planning (Elective III)**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	Students should be able to explain and describe improving transport economic efficiency for transport providers and business user
2	Students should be able to explain, generate alternatives for improving transportation system
3	Students should be able to describe the future demand and selecting the best alternative after proper evaluation
4	Improve mobility levels for the urban poor through promotion of affordable urban transport plans, programmes and technologies
5	Increase the efficiency of existing transport operations through improved planning and management of all modes of transport

Course Outcome	
After completion of syllabus student able to	
1	Explain the characteristic of urban transportation, structure of urban transportation and classification of urban roads.
2	Describe the objectives of transportation planning, data collection for planning and environmental impact analysis.
3	Explain the process of travel demand forecasting & need for interation in different modes of transportation.
4	Describe the use of intelligent Transport System and need to accommodate non-motorized transports.

SYLLABUS

Unit No.1 Construction Industry and Constructions Projects			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction - Types of Construction, Selection of Professional Services, Construction Contractors, Legal and Regulatory Requirements, Changing Environment of the Construction Industry.	**04**		**1**
Role, responsibility of projects Manager, Role of PMC (Project Management Consultants) on major projects. Various construction Equipment's with its Advantages, Disadvantages and its Use	**02**		**1**
Importance of construction industry, Phases of a construction project, participants or stakeholders of a construction project.	**02**		**1**
	08		
Unit No.2 Project Organization			
	Allotment of Hours		**Mapped with CO**

Details of Topic			Number
	L	T/A	CO
Construction company, forms of business organization, structure of construction organization	02		2
organizing for project management, management levels, traits of a project manager	02		2
Traits of a project co-ordinator, ethical conduct for engineers, factors behind the success of a construction organization	03		
	07		

Unit No.3 Construction Planning

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Work break down structure, Planning Techniques- terminologies used, bar charts,Milestone charts, preparation of network diagrams	02		3
Activity cost and time estimation in PERT and CPM techniques, Line of Balance Technique, network technique advantages.	003		3
Precedence Network Analysis, software's in Construction scheduling (MSP, primavera).	02		3
	07		

Unit No.4 Construction Labour and Equipment Management

Details of Topic	Allotment of Hours		Mapped with CO Number
	L	T/A	CO
Need for legislation, Acts regarding fixing terms of employment, Acts regarding providong proper workling conditions.	02		4
Acts regarding social security, need for mechanization, financial aspects of construction plants and equipments.	02		4
factors affecting selection of construction equipments, planning of construction equipments, factors affecting the cost of owning and operating the construction equipments.	03

RASHTRASANT TUKADOJI MAHARAJ NAGPUR UNIVERSITY, NAGPUR
FACULTY OF SCIENCE & TECHNOLOGY
B. TECH CIVIL ENGINEERING (CHOICE BASED CREDIT SYSTEM)

Sem: VIII	**Total Hours Distribution per week**		
Total Credit:03	**Lecture (L): 3Hrs**	**Tutorial/Activity (T/A): 0 Hrs**	**Practical (P): 0 Hrs**
Subject Code:	**BTCVE802T**	**Name of Subject: Digital Land Surveying & Mapping**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
30 Marks **(15 Marks for sessional examination)** **(15 Marks for Activity based)**	**70 Marks**	**45 Marks**	**3 Hours**

Course Objective	
1	To introduce digital land surveying and its application
2	To provide basics of digital surveying and mapping of earth surface using total station, GPS and mapping software.

Course Outcome	
After completion of syllabus student able to	
1	Know the basics of digital land surveying and its applications.
2	Handle the GPS for surveying and plot the details on map.
3	Know the use of DGPS and its applications and advantages.
4	Use total station for land surveying and plotting the details.
5	Use advance software for mapping.

SYLLABUS

Unit No.1 INTRODUCTION TO SURVEYING			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Overview of general survey: Introduction , Need , Application and Types	**02**		**1**
Overview of digital land survey:- Introduction, Establishment of control points.	**03**		**1**
Introduction to advanced digital surveying methods.	**03**		**1**
	08		
Unit No.2 GPS			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction , components	**01**		**2**
GPS signals: Introduction , GPS signals , GPS user segment: Introduction, GPS Receiver code receiver , frequency receiver	**02**		**2**
GPS software – Field software , office software	**02**		**2**
GPS data collection and processing , ERRORS IN GPS	**03**		**2**

OBSERVATION			
	08		
Unit No.3 DGPS and Data processing			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction to Differential GPS	**02**		**3**
DGPS data application and Processing	**03**		**3**
DGPS control station and loop closure technique	**03**		**3**
	08		
Unit No.4 TOTAL STATION			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Introduction, parts , accessories and setting of total station	**02**		**4**
Measurements of distance , horizontal angle, vertical angle and height, Contouring and mapping	**03**		**4**
Errors in Total station , errors and error propagations and survey specification	**03**		**4**
	08		
Unit No.5 MAPPING			
Details of Topic	**Allotment of Hours**		**Mapped with CO Number**
	L	**T/A**	**CO**
Mapping fundamentals , basics	**02**		**5**
Mapping software and Automated Mapping	**02**		**5**
Working steps and establishment of control point	**02**		**5**
Detailing of digital surveying	**02**		**5**
	08

Sem: VIII	**Total Hours Distribution per week**		
Total Credit:	**Lecture (L):00 Hrs.**	**Tutorial/Activity (T/A): 0 Hrs.**	**Practical (P): 12 Hrs.**
Subject Code	**BTCVE804P**	**Name of Subject: Project Work Phase-II**	

Examination Scheme			
Internal Marks:	**University Marks:**	**Minimum Passing Marks:**	**Examination Duration:**
100 Marks	**100 Marks**	**100 Marks**	**--**

Course Objective	
1	The object of Project Work II & Dissertation is to enable the student to extend further the investigative study taken up under Project Phase-I, either fully theoretical/practical or involving both theoretical and practical work, under the guidance of a Supervisor from the Department alone or jointly with a Supervisor drawn from R&D laboratory/Industry.

Course Outcome	
After completion of syllabus student able to	
1	Analyze or Design the Civil Engineering problems by using appreciate methodology in a team work.
2	Interpret the communication skills of team members
3	Use of Modern tools in the field of Civil Engineering

SYLLABUS

In continuation to semester VII work, the group of the students shall collect all necessary information pertaining to the project and analyses it. The group of the students shall prepare and submit a detailed report on the project.

The report shall be type written on A4 size papers and hard bound as per prescribed norms. Broadly the report shall include: Introduction, Literature Review, Problem definition, Data collection and analysis, Results (Numerical / Experimental), Conclusions and discussions.

Acquaintance with survey and research methods and their use in conducting systematic investigations, use of data analysis tools, computational methods and style of report, preparation and presentation shall form basis of evaluation. The group shall prepare and present a seminar based on this work before an external examiner.

Sem:8th	Total Hours Distribution per week		
Total Credit:03	Lecture (L): 03 Hrs	Tutorial/Activity (T/A): 0 Hrs.	Practical (P): 0 Hrs.
Subject Code	BTCVE803T	Name of Subject: Disaster Management	
Examination Scheme			
Internal Marks:	University Marks:	Maximum Passing Marks:	Examination Duration:
30 Marks	70 Marks	45 Marks	3 Hours

List of Course Objective	
1	To increase the knowledge and understanding of the disaster phenomenon, its different contextual aspects, impacts and public health consequences.
2	To increase the knowledge and understanding of the International Strategy for Disaster Reduction (UN-ISDR) and to increase skills and abilities for implementing the Disaster Risk Reduction (DRR) Strategy.
3	To ensure skills and abilities to analyse potential effects of disasters and of the strategies and methods to deliver public health response to avert these effects.
4	To ensure skills and ability to design, implement and evaluate research on disasters.

List of Course Outcome	
After completion of syllabus student able to	
1	Capacity to integrate knowledge and to analyse, evaluate and manage the different public health aspects of disaster events at a local and global levels, even when limited information is available.
2	Capacity to describe, analyse and evaluate the environmental, social, cultural, economic, legal and organisational aspects influencing vulnerabilities and capacities to face disasters.
3	Capacity to work theoretically and practically in the processes of disaster management (disaster risk reduction, response, and recovery) and relate their interconnections, particularly in the field of the Public Health aspects of the disasters.
4	Capacity to manage the Public Health aspects of the disasters. Capacity to obtain, analyse, and communicate information on risks, relief needs and lessons learned from earlier disasters in order to formulate strategies for mitigation in future scenarios with the ability to clearly present and discuss their conclusions and the knowledge and arguments behind them.
5	Capacity to analyse ,design and perform research on the different aspects of the emergencies and disaster events while demonstrating insight into the potential and limitations of science, its role in society and people's responsibility for how it is used.

SYLLABUS

Unit-I : Disaster Management
Disaster and Disaster Management - Concepts
Issues Concerned with Disaster Management
Phases of Disaster Management
Types of Disasters-An Introduction
Natural Disaster, Man-made Disaster
Unit-II : Disasters Case studies & Disaster Management in India - An Over View
Bhopal Disaster : A Case Study
Slow onset Disasters & Rapid onset Disasters
Simple and Complex Disasters
Tsunami : A Case Study
Cyclone Phallin 2013: A Case Study
Evolution of Disaster Management in India, Disaster and Disaster Management in India
National institute of Disaster Management, National Disaster Management Act 2005, The National Policy on Disaster Management, 2009
Unit-III : Refugee Problem
National Plan on Disaster Management 2016
Refugee Problems
Impact of Disaster on the lives of Refugees
Problems of Women and Children during disasters
Principles of Psychosocial Care, Issues And Recovery During Emergency
Relationship between Disasters, Development and Vulnerabilities
Equity Issues in Disasters
Issues of Rehabilitation and Resettlement among the Disaster Survivors
Unit-IV: Stakeholders in Disaster Relief Management
Stakeholders in Disaster Relief Management - An Introduction
Central Government, State Government, District Administration, Armed Forces, Para-Military Forces, Fire Services
Unit-V:Disaster Risk Reduction
Disaster Risk Reduction Strategies, Risk Reduction Preparedness Plans
Action Plans and Procedures, Early Warning Systems, Components of Disaster Relief
Factors contributing to Vulnerability, Disaster Risk Reduction - Master Planning for the Future,

Capacity Building Rehabilitation measures and long term reconstruction
Understanding Kerala Disaster 2018
